Before I get into the changelog, everything on page 1-3 has been written after the project was complete. Just some stuff I wanted to explain.

E-F/R-F have font 25 for all dialogue besides episode 9 which is different (more info in the changelog). The only other exception that I noticed happens in episodes 3-7: the Thinking style is font 26. There are some rare occurrences (mostly in the Go Go Igo to help read the signs better) but in general font 25 holds up for everything.

Episodes 1-20 are a constant shift between a 2.5 pixel border thickness and a 2 pixel border thickness (1 shadow thickness for both). That even extends to the “Elite-fansubs presents” and “Yukari Umezawa’s Go Go Igo!” logo. Here’s a quick table of what each episode has:

2 pixel border	**2.5 pixel border**
8 11 14 16-17	1-7 9-10 12-13 15 18-20

21-42 all seem to be a 2 pixel border. However, the outline and shadow thickness changed again in episode 43 onwards for basically the rest of the anime (besides 4 episodes: 58, 64, 74 and 75 which go back to a 2 border). It’s a 1.25 border that llbx pointed out to me when I was asking about the Memory style colour in episode 62. I matched all the above on a per episode basis (even font 26 for episodes 3-7). For completeness, I even matched episode 9 font sizes.

Besides episode 1: I decided to implement the much later episode titles by R-F at the very start (again thank you to llbx for doing them). I think if E-F/R-F had the ability to redo these subs, they would have also made the same decision. They look far better and properly match the title cards. I did the episode 1 title card exactly like E-F as a homage.

The only thing not done is the E-F/R-F group credits since these basically change every episode. I only did episode 1 to make sure the font was included. I did however do the ending voice actor credits from episodes 61 to 75 like R-F.

Any other changes are solely for improvement when errors by E-F/R-F have been encountered (e.g. spelling). Don't get me wrong it's good to get a faithful restoration but if you can improve the experience by fixing errors, it should be done.

As a quality of life improvement, chapters have been made. This consists of: intro, episode name, ending, go go igo and next episode preview.

This started off as just differences but I also included some interesting info throughout/things I noticed. If something is bolded it means it's more interesting info than a basic change. I mention different styles a lot in this, so here's a quick explanation.

Default: Normal dialogue as characters are on screen.

Thinking: Dialogue that is not spoken and only when the character is thinking. Simple Italic applied compared to Default with Bold removed.

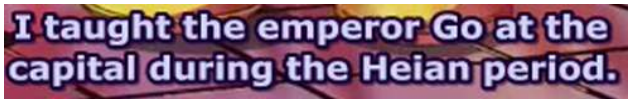

Background: If the person speaking is off screen.

Sai: For when Sai speaks.

Memory: Dialogue that references past events or when flashbacks happen. Mainly for opening 2-30 but episodes after this also have it (as far as episode 69).

Thinking Background: Very similar to thinking, just when the character is off screen (e.g. when the Go board is shown). You also have the same for when Sai is thinking.

I was going to put these on separate documents but may as well have it all here at the end of the changelog. Make sure to download the pdf so navigation works.

There are 2 small glitches in the source video that got fixed in episodes 49 and 55. You can read more about that here.

The batch script to mux all 75 episodes can be found here.

CRC32 checksums can be found here.

Changelog starts on the next page.

Episode 1

When I mentioned in the readme about styles not being assigned in the gabest11 subs, you have to look no further than the second line of the anime. “This is not the best move…” is set as Default when it should be Background (or Noise as they once labelled it). The gabest11 subs didn’t even have the Sai styling or Memory style at all so they were made from scratch. Thanks to llbx who helped me pick colours for those.

2:48: Typo fix. In the note E-F had “Akari is thinks” but it should be “Akari thinks”.

3:52: They styled Akari talking as Sai when it should be Background.

Took some liberties with E-F sub styling. For example during the memory sequence of Sai and Hikaru (starting around 4:36 on E-F), E-F did this with Default styling but it really should be Background styling. They even apply the Background styling sometimes (e.g. "What are you?" at 4:41) so I guess they just forgot to apply it in places. They also applied Background to Sai talking (4:37) instead of the Sai styling. Fixed that.

9:35: The “Do you want to go to the nurse's office?” line is really fast but it is frame matched as is the “No, I'm okay now.” line. I don’t know how you would improve this without completely changing the lines.

10:45: E-F had Sai talking as Background but the other lines are all Sai styled, so I also changed it to Sai. Gives consistency to the scene.

10:48: E-F didn't put a space between the 3), 5) and 7) but did in the previous time it was on screen. Makes more sense for it to be a space.

10:49: Extended this by 2 frames to help read in time and set it to Background.

10:57: I debated about this one for a while. The gabest11 subs had “Yeah! That's the one. Where did that Commodore Perry come to?” but E-F split this into different lines. The problem is I think E-F is just too fast doing that so I decided to keep gabest11 subs but made it start 1 frame sooner. I did leave in commented lines with the same frames as E-F if someone does want them.

11:05: Set to Sai.

11:19: Set these 3 lines to Sai (again for consistency in the scene).

Around 11:54 they styled Hikaru as Sai so that got changed to Background which again seems to make the most sense.

12:02: There was a typo of “internationl” in the note. Fixed. They also had Harumi styled as Sai so I changed that to Background.

12:22: Set these lines to Background. Some were default and others had Sai styling.

12:32: gabest11 subs missed out “a” in the “Oh there is a kid!” line. Fixed.

13:04: E-F started “If you say so Akira-kun!” from when Harumi sort of sighs. Changed the timing slightly to be just when she starts speaking.

14:32: Considered adding spaces for Hikaru’s counting. “1, 2, 3, 4…” vs “1,2,3,4…” but kept like E-F for the charm. gabest11 subs had this ending slightly too soon and E-F had it bleed 2 frames into the next scene so instead I ended it on scene end. I think it’s much better like this.

I started to apply the Thinking style with Touya saying "That's the way a beginner holds a stone...". E-F only started doing the Thinking style in episode 3 but no reason not to do it from the start. As things progressed I realized I should be doing small improvements like this.

Update: Seems like the correct choice. In episode 50 (10:59) which is a sort of recap episode, R-F did actually style this as Thinking. I considered doing the style even earlier with lines like "Oh I'm sorry, I have no intentions of playing Go" but doing it starting with Touya makes it pretty obvious to the viewer that these are thoughts.

I didn't apply the Thinking style for the "from a far higher position…" scene as that part is pretty iconic for me and wanted to leave it the same as E-F.

15:54: Changed Josek to Joseki in the note.

17:26: A double fix here. The gabest11 subs had 18-4 but it should be 18-14 as E-F have. E-F styled it with some large Times New Roman which I'm pretty sure is just an error. Probably when setting the style they misclicked as every other line in this scene is Sai styling.

19:29: E-F had "It was 50 years to early for him" but it should be "It was 50 years too early for him". Fixed.

19:49: moku got changed to Moku in the note.

Ending 1: Most of the endings done by gabest11 are fine but ending 1 was pretty bad timing wise. Some lines stopped much too early. Thanks to llbx for retiming this. Note: Episode 1 ending lyrics start slightly later (frame 29789) than the other endings so it required shifting. Episode 2 and 3 start on frame 29784 but 4 to 12 start on 29785 (llbx timing).

One big difference compared to E-F in the very early episodes: They didn't even include the kanji. For that reason, gabest11 decided to do the much later versions at the start with all kanji included. This is mostly for opening 1 as ending 1 has no kanji even in the last episode it features in (12). Additional note from llbx on ending 1:

“the lyrics here is pretty inconsistent. very interesting how even E-F had differences between ep 1 and 12 here as they understood more and more of the lyrics. because of that the only problem i noticed is the ano hana mo waratteita! line, because the romaji and kanji doesn't match (if you want to keep the kanji in).
the original lyrics has "あの花は笑っていた" and "ano hana wa waratteita!", but this would change the translation too to "That flower was laughing!". Basically the same as the previous line but with flower.
or you can remove は from the kanji line, and leave the rest as is, but then it will be incorrect.” は was removed from 1-12 under the guidance of llbx.

The end of the Igo and Next Episode preview are slightly cut out on E-F (TV capture problem most likely). I started the “Shidou Go” note as the dialogue started which is very common for early E-F episodes.

Episode 2

2:48: Changed this from Background to Sai. I know Sai isn’t on screen but at 3:04 E-F did assign Sai styling when Sai isn’t on screen so this should be done for consistency.

3:08: Set to Background.

3:24: Typo by E-F. “Shindo-kun”, changed to “Shindou-kun”.

3:45: Both these lines set to Background.

4:04: All this little interaction set to Background.

4:36: “It’s” to “it’s”.

7:44: Set to Background.

9:43: I was really uncertain if I should have changed this to “me doing” but “my doing” isn’t wrong I guess so left as is.

10:05: Just thought I’d mention but sometimes in this episode E-F did not have a space after … but I fixed all that I could see.

10:16: Took out an extra . E-F had.

11:02: Set to Background.

11:13: E-F had an extra space between “wrong?” and “Sorry.” Fixed.

11:56: As stated in episode 1, E-F didn’t start doing the Thinking style till episode 3 but this is a good example of when it should be done.

12:13: Set this to 3 … as E-F had 4.

12:33: “numbers” to “number” for both lines.

13:42: “A wig?” set to Thinking.

14:52: E-F had this as Background but setting it to Memory should be better since it’s dialogue from episode 1.

15:31: Three lines set to Thinking. It really fits here.

15:51: Took out “a” to make it “from 1000 years ago.”

16:03: The same here. Took out the “a”. If it was “thousand” then the “a” would have been kept.

16:12: Set to Thinking.

16:33: Set to Thinking.

17:21: Set to Background.

18:23: Set to Background.

19:34: Set to Background.

19:50: Was going to set this to Background but it’s a close one so left as is.

Episode 3

This is the only episode that E-F moved the “Fujiwarano Sai, a GO player from the Heian period…” Memory style lines down from normal. I think a vertical 10 matches pretty well but it’s hard because on Blu-Ray you can see slightly more of the bottom of the frame but TV sees more of the top.

Around 15:54, E-F styled Touya talking as Sai as a sort of Memory in the background but this should really be styled as Memory.

16:36: Signs. Pretty sure they must have copied/pasted from Episode 1 as the “internationl” typo is still there. It made more sense to just stick the episode 1 styling in here as it looks better. Episode 3 is kind of squished together.

19:55: “inbetween” to “in between”.

During ending Igo, E-F had "I want to become one too..." but I managed to pick up "tabetai" which means "want to eat". I agree with gabest11 subs which had that (also because they are eating). Everything else is the same as E-F.

The “Umezawa Yukari’s Go Go Igo!” logo in this episode is very different with it all being on one line. Made that change.

Episode 4

There are so many different versions of the Copperplate font (E-F used this for the Tea Ceremony sign etc), it was so hard to match. I tried about 8 different versions before just going with “Copperplate-Gothic-Bold-Regular” since it was the most popular version on fontsgeek (400,000+ downloads) and looked the closest. Other versions I was having to apply -fsp values to match which there is no way they did. I also applied Bold to an already Bold font but it seemed to match fine and E-F do apply Bold to a lot of fonts anyway. This is also probably the only bord2 sign in 1-7. If you do 2.5 it seems slightly too much.

The Tea Ceremony sign and others with Copperplate are basically as close to a direct overlay as I could get. You will notice for example that the scene with “Tea Ceremony” is more zoomed in on Blu-Ray than TV broadcast. What I did was comment the direct overlay then slightly moved them to visually match Blu-Ray better.

7:21: The Tea Ceremony sign ended too early by 2 frames on E-F. Fixed.

3:27: “Nevermind…” to “Never mind…”

Episode 5

3:24: “afterall” to “after all”.

5:01: As talked about in episode 4, this Copperplate sign is almost impossible to match due to how much more zoomed in Blu-Ray is. Commented out overlay and just moved the y up by 2 pixels.

6:56: Signs. This was a tough one. The line breaks were not an exact match. I have a feeling they must have individually placed “Junior” and “High” because of this. When I say not an exact match I’m talking about 1.5 to 2 pixels but just thought I’d mention it. Just decided to set a static y value for every sign that I overlay matched then moved accordingly to match Blu-Ray better.

12:28: gabest11 subs had “And... Haze Junior High against Kawahagi Junior High is on seat F.” twice. Have fixed this and changed timing to match E-F better.

This E-F episode didn’t have the next episode preview so I kept what subs gabest11 had and just styled them.

Episode 6

4:00: E-F had “you stupidity” but it should be “your stupidity”. Fixed.

11:51: Space for “Mr. Yun”.

19:33: E-F had “Junnior High”. Fixed.

Episode 7

1:53: “Spring came, and I entered Haze Jr. High” set to Background.

3:18: E-F had this as Background and I understand why but the guy is actually on screen when he says “What?” so I put that as Default.

3:48: Changed priviledge to privilege. Gabest11 subs had this anyway.

6:20: Not sure about this. E-F had “Go club? We have a Shougi club?” but the gabest11 subs didn’t have a ? after “Shougi club”. It makes more sense for this not to be a question.

7:35: E-F styled “I’m looking forward to…” as Sai but Memory makes more sense.

9:05: It should be “embarrassed”, not “embarassed”. Fixed.

10:46: Set Thinking to memory colour instead of Sai style.
12:36: Took capitalization off “Quiet!”

13:43: E-F set “Nice to meet you.” to memory when it should be Background or maybe just Default depending on how you look at it. Each choice is an improvement though.

13:48: “Yes” was set to Memory styling. Changed to Background.

14:11: E-F had “embarassment”. Should be “embarrassment”. Fixed.

15:51: I kept what the gabest11 line was here. E-F subs didn’t have “I would not mind at all.” and for how long Tsutsui is speaking it makes sense to have it. The gabest11 subs had a typo here of “Fujiwaki” when it should be “Fujisaki” so also fixed that.

16:00: “Oh man…” set to Background style.

19:15: Capitalization on Fridays.

19:52: “Yes!” changed from Memory to Background.

22:50: During the Igo, the black and white territories text is on for a really short time. I gave it an extra couple of frames but still really fast.

Episode 8

THIS IS THE FIRST OUTLINE CHANGE EPISODE

See above for the table.

I have gone through every episode and changed the border thickness on a per episode basis as some episodes like 9 and 19 are back to 2.5. The shadow thickness has not changed.

For episodes 1-7, E-F applied a font of 26 for Thinking (this has been matched). For every future episode including this one, they did font 25.

I am also sure this is the episode that E-F started doing Arial for Notes and ending Igo. See 2:12. The lower case t is easy to spot. Episode 7 notes and Igo was definitely Century Gothic.

2:12: This is the first instance (that I saw anyway) that E-F changed from Century Gothic to Arial.

2:18: “Yes Hikaru, that’s it.” changed to Sai styling. E-F had default for Sai.

2:21: They styled Welcome as background but not “This… and this”. Changed.

2:24: Extra confirmation of change to Arial with the Touya Meijin book. There is no change here just making it known.

2:36: Another example of Sai speaking as default. Has been changed. There are more of these so just know that if Sai is talking, it’s been set to Sai.

2:55 Set to Background. I’ll stop listing so many of these but just know that when appropriate it has been done.

3:45 onwards: Lots of changes from Default to Background style.

9:20: “Wait… oh yeah!” styled as Thinking.

Episode 9

E-F seems to have chosen font ~24 for this episode. The Thinking style also seems to be ~24. What’s interesting is that the Memory style for “Fujiwarano Sai, a Go player from the Heian period” actually is the standard font 25.

This is based on a script size of 640x480 and I know the video is 512x384 but every script was set to 640x480 since most of the episodes actually are 640x480. The 512x384 values would be font 19 for normal text and font 20 for Memory. When overlaying 640x480 script on the 512x384 video, a font size of 23.75 seemed like a pixel match but setting 24 is fine (since we know E-F also just put the value down by 1).

They actually went back to Century Gothic for the Notes at 2:43 so just need to see what they chose on a per episode basis from now on.

3:09: Space for Mr. Yun.

3:13: gabest11 subs had “freshman” but E-F had “freshmen”. He seems to be talking in a plural sense (especially when he’s still being sneaky trying to trap Touya) so changed to E-F.

4:44: First line I noticed the font change difference. If you set fs25:

4:52: The gabest11 subs were not exactly like E-F. 2 lines on E-F got combined into one. It’s easier to read that way but for sake of accuracy, I redid this as E-F. I commented out the gabest11 lines if anybody wants to look at them. The only change was “alot” to “a lot”. The gabest11 subs also capitalised “Meijin” but E-F did not so kept as meijin.

5:03: E-F incorrectly styled the Go club member as Sai. Changed to Background.

6:21: The “Hmm!” was not included on gabest11 subs. Added it in.

6:33: E-F had “To” instead of “You”. Also changed “alot!” to “a lot!”. Fixed both.

7:39: The gabest11 and E-F subs both had “to great a gap?” but it should be “too great a gap?”. Fixed.

7:43: Took out the “a”.

7:48: E-F had “to play him” but gabest11 subs had “to play me” and it probably makes more sense. Touya knows what is going on.

8:11: Capital for “Huh?”.

8:52: E-F did actually capitalise Meijin in this line so maybe change 4:52. I guess having these quirks is what adds to the early charm of E-F subs.

16:55: E-F timed this slightly differently to gabest11 subs so did that.

19:42: Added “the” between enter and Go.

22:14: First example I have seen of Times New Roman.

22:18: E-F had “Teacher Komatsu” for some reason. Fixed to Yukari unless I’m somehow missing something but don’t think I am.

22:53: E-F mistimed the start of “Thank you very much!” pretty badly. Fixed.

Next episode preview isn’t exactly like E-F since the TV broadcast was advertising the dream song so I just styled what gabest11 had. The ending lines were changed to E-F and translator’s note about Seichi included.

Episode 10

Thankfully for this episode they went back to a 25 font.

The starting "Fujiwarano Sai" Memory lines. The timing that works basically for episode 3 onwards does not for the following episodes: 10, 11, 12, 22, 23 and 24. For these you have to go back 1 frame or else they start slightly too late. Also took a frame off the end to keep the same timing. 69 frames for line 1, 95 frames for 2 and 56 frames for line 3. Also if anybody is wondering, yes I did individually check every episode and matched the intros. E.g. some had "go player", others "Go player". Others would have … or , after "Hikaru". I matched all 29 episodes (obviously episode 1 does not have this).

2:16: Set 3 lines to Background.

4:19: "Speaking of…" set to Background style.

5:31: Was going to change "farfetched" to "far-fetched" but it's technically not wrong I guess so kept as E-F.

6:10: Second example of Times New Roman Bold with the noodles sign. E-F added a red outline to the text but I think it looks better without it. I did add the border though to match.

8:33: They styled this line as Memory by accident. Should be Background. This is the same for the next couple of lines.

13:56: Putting a comma between both wins makes the most sense. Also what gabest11 subs had anyway.

14:52: E-F typo. Should be "possessing". Fixed. Gabest11 subs also differed a bit here in timing so fixed that to be more in line with E-F.

15:36: E-F had this styled as Background Thinking but since Tsutsui is on screen, it's better to just have it as Thinking.

18:24: Kept the … after "but" from gabest11 subs since it's a continuation of the sentence on the next line. E-F didn't have this but they normally do.

Episode 11

1:58: Set to Background style.

2:13 to 2:18: Three lines set to Sai style. The gabest11 subs also had different timing here to E-F so I changed them and commented out the gabest11 lines. The "we have to make him stop!" line might be on for slightly too long but it's the same frames as E-F.

4:22: Set to Background. I think E-F just forgot because the "Umm…" is Background.

4:26: During the counting, E-F has 2 spaces for some numbers and , so set them all to one space for a more even look.

4:33: Set to Background. Same for 4:48 and there is likely more so just know when appropriate, Background was applied if E-F didn't do it when it should have been.

5:28: Changed to "After all" since it's correct. E-F had "Afterall".

6:00: These lines should maybe be set to Thinking but meh. Kept it as E-F. I did however keep the timing gabest11 subs had as E-F finished pretty early.

6:17: Should really have a ? added.

8:34 to 9:04: Background style applied and Sai styling.

11:22: Kept the comma between both “you’re slow” that gabest11 subs had. I don’t think people care about such slight differences but it looks better.

12:14: Same with this. E-F doesn’t have spaces after the … but it should have it.

13:52: Styled as Sai.

14:08: Changed to “anymore” from ”any more”. Pretty sure that is correct.

14:49: Adding “the” for “the Go club” seems much better.

16:40: Should be “after all”.

17:00: E-F had “Sorry.” at the end of this line but gabest11 subs had “Take a seat.” It makes more sense for it to be that than “Sorry.” since he’s actually playing Hikaru.

22:16: Capitalization on “so”.

Episode 12

1:49: Second time I’ve seen a major difference between the TV broadcast and Blu-Ray. The “Hey boy, take out 10,000 yen.” just doesn’t exist on the TV recap. I took the exact line from episode 11 and put it in.

6:47: Set to Background.

6:49: E-F had “Mr.Yu”. Changed to “Mr. Yun”. Also set to Background.

9:42: Changed “Stones” to “Stone” in the Note as more correct.

11:17: Space added for “Mr.Kuwabara”

15:34: Had two !! so changed to one.

17:39: Set to Background.

18:39: No capitalization on thanks.

20:05: Capitalization for “Why”.

22:34: Didn’t really agree with Sai styling but it also doesn’t make sense to do Background so kept as is.

The next episode preview isn’t really covered on the TV broadcast. I kept what gabest11 subs had besides the last line which is on E-F.

Episode 13

6:16: Styled as Background instead of Memory.

7:20: This should be Memory.

9:40: E-F didn’t actually have the “I see…” line but it makes more sense to have it.

13:34: E-F had “calm him down” but gabest11 subs had “calm myself down” which makes much more sense.

13:57: Both lines should definitely be put to Background.

Ending Igo: Another sneaky change to Arial here. Pretty sure I’ve caught all the switches so far but you never know. Strangely, the “Hikaru no Go Junior Beginners Go Class.” actually is Century Gothic. Very frustrating.

22:28: “our selves” changed to “ourselves”.

22:47: E-F has Yuugen and Yugen in this note but the other note and even the subtitles have Yuugen. This is also mentioned in episode 61 as Yuugen so likely they just forgot to add an extra u. I have added it to the note. I commented out the E-F version with Yugen.

Episode 14

13:38: Changed to Background.

14:32: Changed to Thinking with background colour applied since Mitani is off screen. E-F did this for the next line so no reason not to do it for this one.

16:17: Again set to Thinking with background. It’s the main theme of this episode.

You better believe I was putting stuff like this in:

Episode 15

E-F logo: They did some interesting colours for the title in this particular episode. I tried to match it with colour picker. Also the timing changed which I also matched properly (was a visual match and 88 frames total just like E-F).

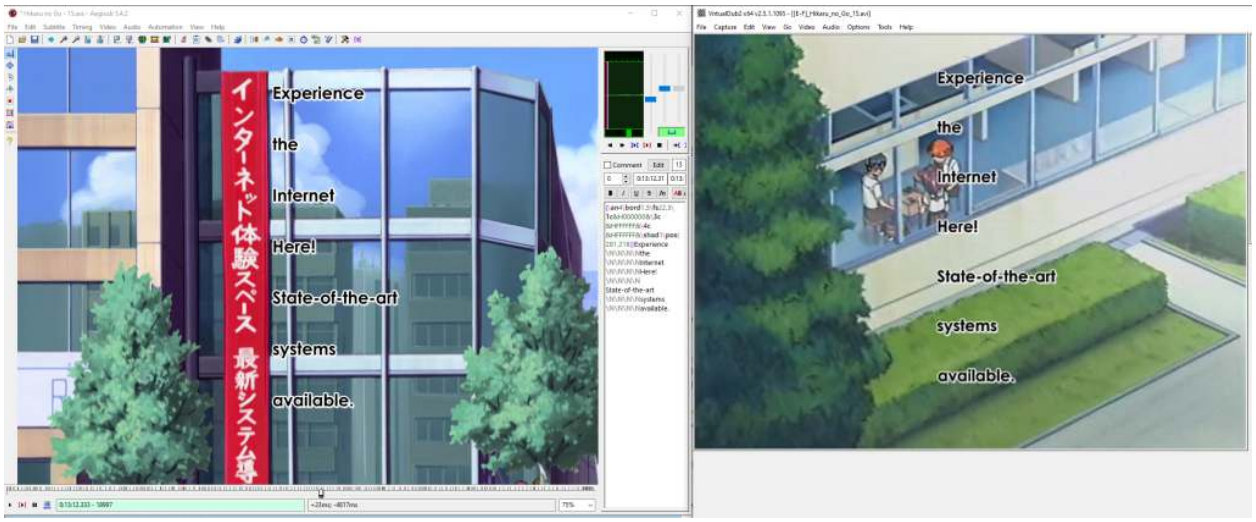

2:55: Strange Note. It definitely seems to be non Bold Verdana and when matching with E-F overlaid, font 30 seemed like a good fit but on the actual Blu-Ray, font 28 seemed like a better visual match overall.

8:29: Set “What does it say?” to Background. The gabest11 subs completely missed out the next line “Let’s see…” so I timed and styled that also to Background.

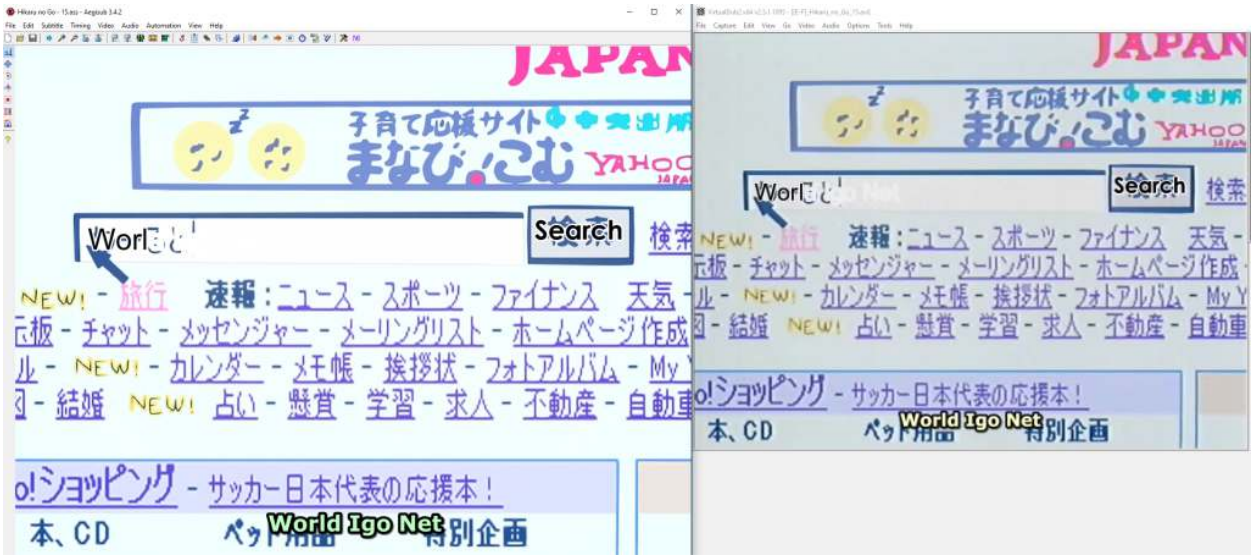

9:36: The “Logging in with your User name.” sign started 1 frame too early and ended 3 frames too quickly on E-F. Fixed.

9:59: I kept the timing for what gabest11 subs had here. With E-F it was really hard to read quickly, especially with 2 people speaking.

13:12: E-F started the sign about the internet slightly too early, fixed. I set stuff like this to bord1.5. Setting bord2 seemed too much.

13:36: You may notice the typewriter effect for “World Igo Net” in the search bar.

You can see the outline of the text but I left it like that since this is exactly what E-F did. In the subtitle script I commented out a proper hiding of the text version with alpha&HFF/alpha&H00 if anybody wants an improvement. I matched both versions to show the next letter after 7 frames just like E-F. Also set the 2 lines “World Igo Net” and “And search!” to Background which it should be since E-F does it lots when the computer is on screen. They probably forgot.

13:41: I changed the timing to better match when the Search button shifted colour compared to E-F. They were slightly too early by 3 frames. I also properly extended World Igo Net and Search signs to end on the right frame. E-F ended them too early by 3 frames.

13:42: E-F didn’t have “Let's see…” spoken by Mitani’s sister but the gabest11 subs had it. I put it 1 frame back compared to gabest11 as it started too late then took a frame off from the end to still keep 24 total frames.

14:33: gabest11 subs had this over 1 line and E-F was 2. I slightly extended the timing to make it easier to read.

17:27: Set to Background as it probably should be.

20:23: Set to Sai styling.

20:29: Sai styling applied.

Go Go Igo: This might be the first time that Igo has ever had a Verdana note… pretty sure it's Verdana anyway. They change fonts a lot during this Igo… AHHHHHH!!!!!!!!!!!

Episode 16

3:33: Set to Memory style.

3:48: I kept "I'm so happy!" on for the whole duration. E-F removed 1 frame between which just seemed out of place.

3:59: Set to Background.

4:50: Set to Background.

5:33: More Background applied. I'll stop listing it if more pops up like this.

10:23: gabest11 subs had "go to Japan" and I think it fits better than "got to Japan" even if technically also correct. **Update: In the ep 17 preview they actually do have "go to Japan" so a good change.**

22:26: E-F did Background for Yuuki but he's still on screen for it. Set to Default. Same for Mai.

Episode 17

4:28: The gabest11 subs had “Sai wa nanimono ka?” but E-F had "Sai to ha nanimonoka?" so changed to that. I also changed it to Background. E-F decided to put the “Sai? It has to be. They're all talking about Sai.” line as Background and even though it starts with Waya on screen, for a majority of the line he is off screen so I kept it like that.

4:35: The gabest11 subs missed out “be” in “Please be quiet”. Fixed.

4:42: No reason for “People!” to be Background.

5:01: Space for “Mr.Ogata!”

5:54: No capital for friend.

6:56: No need to set this to Background. Only a couple of frames are actually offscreen.

15:19: E-F didn’t actually sub the “Yeah.” but gabest subs had it. Just kept it in.

16:46: Capital for Sunday.

16:55: Maybe I missed it prior but this is the first instance of Courier for a Note that I noticed. gabest11 Opening 1 had “Courier New” so I used that with non bold. It seems to be a good fit. I set it to White as it doesn’t look to be Grey.

17:00: Capital for Sunday.

19:25: gabest11 subs make more sense here. Two people are clearly talking about Touya not arriving so having “Touya Akira hasn’t arrived yet…” would be wrong.

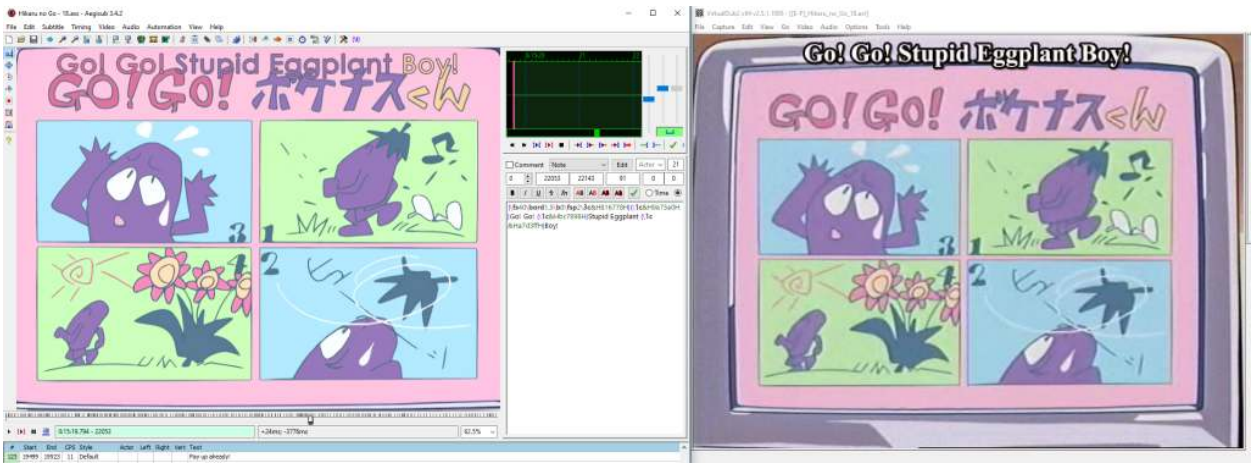

22:12: E-F did not sub this line so I just kept what gabest11 subs had.

Episode 18

2:10: Same as 19:25 in Episode 17 since it's the recap.

10:43: gabest11 actually did a pretty interesting version here for the signs which I liked but I thought I would just do what E-F had. Left gabest11 version commented if anybody wants it.

15:19: I was really close to keeping what gabest11 had for this sign as it's far better. However, I did decide to comment it out and just do the basic Times New Roman sign of E-F as people probably want accuracy. Like 10:43, I commented the line if anybody does want it.

16:39: Rhinoceros is the correct spelling. This means the Note was also changed to rhinoceros.

22:30: The note said "find our how" but it should be "find out how".

Episode 19

3:39: Space for “Ms. Tamako”.

4:51: Don’t know how I feel about the Memory styling E-F did for this. It sort of makes sense but maybe Background would fit better. I kept Memory for now.

11:38: I like the timing gabest11 had for the note so it can be more easily read. It now extends until the end of the next scene rather than stopping on the same frame as “Sure.”

18:16: “you” to “your”.

Episode 20

6:35: gabest11 subs actually missed this line/subbed it much later so I had to put it in.

6:53: “robbin” to “robin”.

10:37: Capital for “December”.

13:06: Capital for “Sunday”.

13:40: Space for “Mr. Ogata” and again at 14:05 and 14:24… 14:49… basically lots.

15:29: Kept the , between the two is.

16:57: E-F had Background but Default makes more sense since Akari is on screen for most of it.

Episode 21

Each episode now up until 42 is a 2 border thickness.

I am pretty sure this is the episode that E-F started doing Arial for Notes and ending Igo. See 2:12. The lower case t is easy to spot. Episode 7 notes and Igo was definitely Century Gothic.

2:43: R-F did ordinal title numbering so to keep in line, - will be applied when appropriate to this episode and all others.

4:09: Capital for Kaga.

5:08: Extended the Monthly Go World 12 sign all the way till the end of the scene as E-F stopped it one frame too early.

5:14: Was going to set “Shindou-kun's goal is Touya Akira.” to Background but since E-F didn’t do this and Tsutsui is on screen, decided not to.

5:18: gabest11 subs had “this years Pro exams.” but it should be “this year's Pro exams.” as E-F has.

7:01: Small punctuation change.

13:56: No capital for “we”

16:08: The note colour isn’t an exact match to the Blue by E-F. It felt out of place so instead I colour picked from the side of the sign for a happy medium.

22:47: E-F didn’t subtitle Yukari’s “But it was a good game!” at the right time. I guess they were relying on the sign for it. I decided to do both but styled the note as century gothic and not Verdana to fit the other signs in the igo.

Episode 22

2:01: Title. gabest11 actually overshot this title for how long it should stay on and E-F undershot it by 2 frames. Ended the timing just like any other episode.

9:06: No capital for “surpass”.

14:54: Kept the note on the whole time. E-F took it off slightly too early.

15:10: Put 3 … as is standard for E-F. I think they just left it out by accident.

16:06: E-F started this sign way too early. Fixed.

16:12: E-F did alignment 8 tag for these two lines. I guess they did it since the characters would be obscured if not so I kept it.

19:25: Set these 2 lines to Background. I know the second line is really fast but it’s even shorter on E-F subs. Might need relooked at.

23:00: During the next episode preview, E-F had “He came to watch” but the gabest11 subs had “He came to see”. I decided to change to “see” because in the actual 23 episode, E-F also had “see”. It also makes more sense.

Episode 23

2:06: Started the note on the beginning of the title card.

2:23: Set the Note to not be 1 frame into the next scene. Slightly better that way.

2:49: Set to Background.

3:44: Typo I think “sixths” by E-F. Now it’s “sixth”.

6:40: “inbetween” to “in between”.

6:51: Capital for Sunday.

7:08: Typo fix. “Shindo…” to “Shindou…”

9:32: E-F actually started this “I won’t…” line much too early. gabest11 subs started it at the correct time but it was quite hard to read in time so I extended it till the end of the current scene. Now it’s at 15 character per second.

11:14: Just the one ?

14:48: Hard to figure out the exact alignment tags for some of the text here, I did the best I could. I did however fix the timing of when it should appear/disappear compared to E-F so that’s good.

17:57: Sai styling instead of Background styling.

Episode 24

2:35: E-F stopped the scrolling sign 1 frame before the scene end so I extended that by 1 frame. This means the scroll ends at a slightly different position but if E-F was to have extended it the whole way, it would likely be a match or a couple of pixels off at most.

6:55: One of the few notes I have encountered from E-F where the start time is not the same as the dialogue. I did my best to match it. gabest11 did this note but it ended much too quickly.

10:46: 2 lines set to Background makes sense.

11:56: Set to Background.

13:56: E-F did Italic Memory here but just Memory makes more sense since it's spoken words.

14:08: Seems like a mistake in timing by E-F, some of the line isn't subtitled. I kept what gabest11 had as it made more sense. Also set to just Memory.

Couldn't do the R-F next episode preview as the TV broadcast was about a special deal for Hikaru no Go/Prince of Tennis. I altered the timing for gabest11 sub line "No, I have to go!" as it started slightly too late. "Hikaru you are afraid." also moved back by 1 frame and styled all appropriate to Sai.

Episode 25

E-F completely changed the intro font to Century Gothic (also colour of presents and the timing of when it appears). I tried my best to visually match. E-F was 89 frames but on Blu-Ray if you time just before the logo "settles" like R-F then it's 90 frames.

1:46: E-F forgot to unassign the Bold for the Thinking style in this episode. Lots of examples. Fixed them all.

2:22: Title names completely changed. I guess it's because of the double episode stuff. I just stuck with what gabest11 had for the name and that's what online had also (Fear and Impatience).

3:40: Styled as Sai when Waya is talking so set to Background.

3:52: No capital for "But" since it's a continuation of the sentence. E-F normally does this.

4:18: I tried to colour pick the sign since the Yellow from E-F seems strange. Just a small improvement. I also fixed the timing.

6:00: No capital for “Let’s”.

7:56: Capital for “May”.

11:50: No capital for “Maybe” since it’s a continuation.

12:21: Tried to colour pick for the sign since it looks better than the Yellow.

13:54: Capital for “February”.

14:01: Background applied for next lines.

15:15: E-F typo. “Ashiawara”. Fixed.

16:00: Made sense for “but” to be capitalised.

17:51: E-F didn’t actually sub this line but just kept what gabest11 subs had.

18:05: Set to Background.

The ending Igo. The music and stuff is different. Most likely due to the combined episode as they did a mash together at the end. Some stuff on TV wasn’t included on the Blu-Ray and vice versa. I did my best with the placement of signs since they changed and did a basic translation for the last sign (see screenshot). The gabest11 subs also didn’t translate the last line which the “official” subs had “There are areas open to the public in the Japan Go Association, so feel free to visit.” so I included that.

As it was a dual episode, this also means the next episode preview didn't exist for E-F. I just styled gabest11 subs to what it would likely be and slightly adjusted timing.

Episode 26

Just like episode 25 (since it's a dual episode for E-F), the bolded italic thinking still exists and the episode name is different. I copy/pasted the 25 intro onto this episode.

2:30: If you look really closely, E-F tried to do signs but they completely messed up the font size and it's all white so you can just barely see it. For that reason I decided not to do it.

11:19: 3 lines set to Background.

11:52: Like 2:30, they messed up the font size and stuff.

13:14: gabest11 subs had "can't" which made more sense than "can" which I was going to keep but then the next line I think Sai saying "Wait... what am I saying?" is a reference that he actually meant to say can't. I could be wrong but that's how I interpreted it anyway. It's the same as E-F.

15:04: gabest11 subs actually started this line earlier. I kept it because it makes more sense since Waya is actually speaking. E-F timing would likely start on frame 21719 (Waya mouth opening visual indicator).

16:25: This note is actually somewhat visible in font size so I did it. The problem I had is the colour of the paper on the Blu-Ray is really close to White and it's more of a sort of grey on TV. I decided to colour pick from E-F but it was still hard to see so I added a 0.5 border. It's not an exact match but best you could do in a situation like this.

18:38: Set to Background Thinking.

18:48: Again I tried to colour pick from the sign.

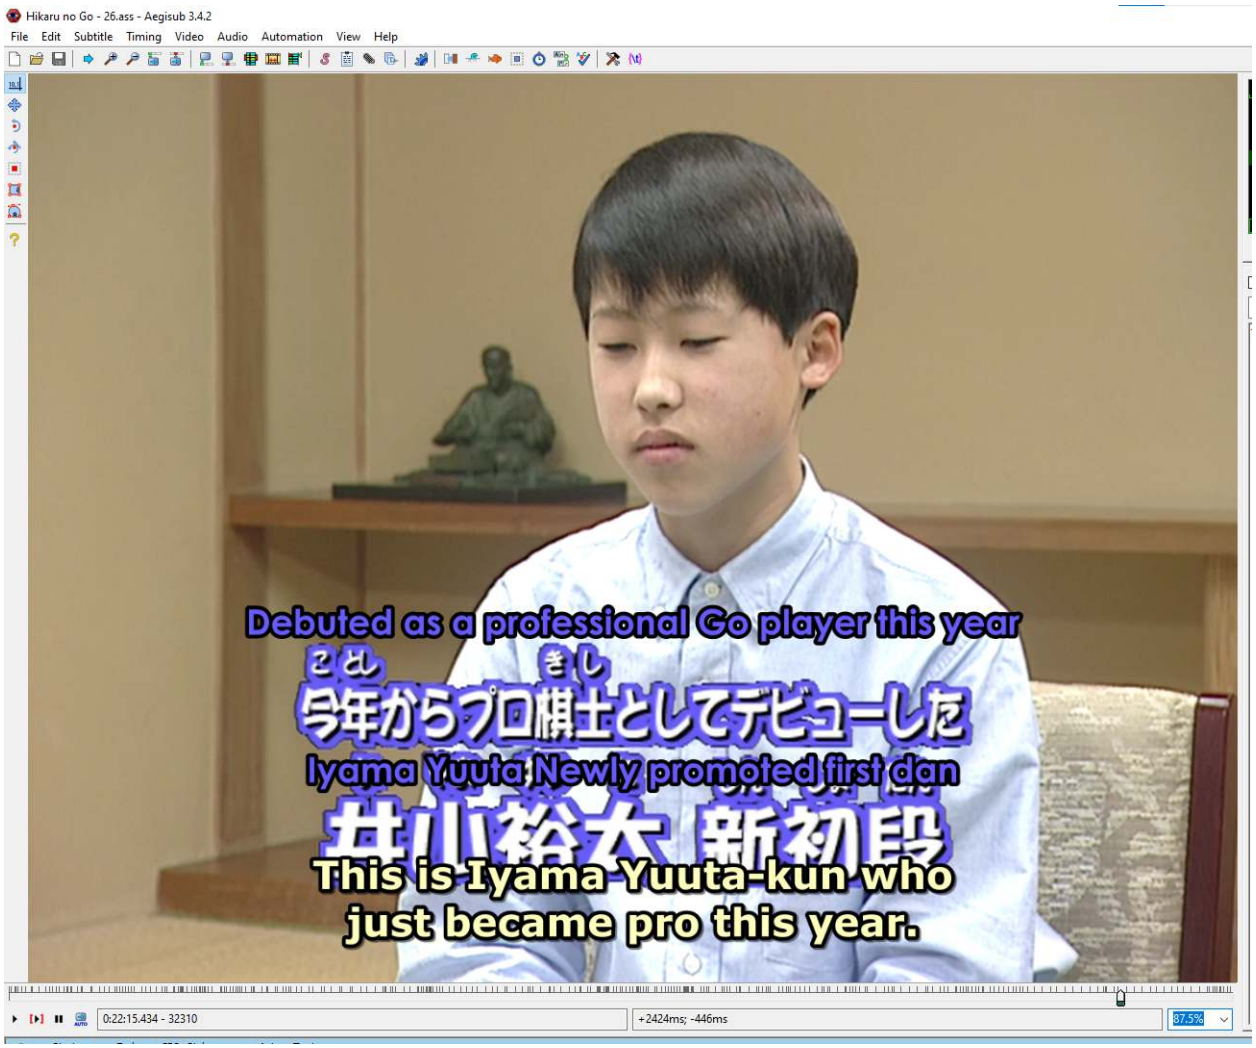

19:11: Set to Background.

19:13: E-F didn’t actually sub the “Oga…” but it’s a nice addition.

19:55: Background applied for next couple of lines.

20:21: This was a bit of a strange one. gabest11 subs here may have been better but I timed it frame perfect to how E-F did the dialogue.

Like 25, the Igo on Blu-ray has much more questions (and music is different). For ones not included on TV, I kept gabest11 subs but changed questions to E-F subs that were included. Below Igo signs were not included on E-F but I did a basic translation for all.

The Japanese Go Institute The Room of Yuugen sign came from E-F when they are talking to Ou Rissei (not Iyama Yuuta as on Blu-Ray) but placement is much different so I lowered the font size to fs17 and centred with the text the best I could. E-F sign:

日本棋院
Japanese Go Institute
「幽玄の間」
The Room of Yuugen

E-F actually had a typo in ending Igo. “competetive”. Fixed.

Next Episode Preview (this is at the end of E-F’s 25-26 episode): E-F forgot to style the first line as Sai. Fixed.

Episode 27

2:05: Capital for “Tuesday”.

3:00: Both lines set to Background.

4:13: E-F didn’t sub “Yeah.” but kept it in.

6:19: Maybe E-F was having a joke here with “Wasabi”. It’s so random that I left it in. Also exactly 8 frames as E-F but it seems like Blu-Ray timing is 1 frame different (Sai’s foot on the window has 4 stationary frames on TV but 3 on Blu-Ray). This means the scene with the cherry blossom tree got 1 extra frame to match 8 frames.

10:53: Set to Background.

11:40: Bad timing from E-F. Fixed.

13:16: “afterschool” to “after school”.

13:47: No capital for “so” since it’s a continuation of the previous sentence.

15:35: Was close to changing “good’ll” but kept it.

16:31: Slightly different timing compared to E-F on the gabest11 subs for when Koike speaks but it probably makes more sense. If looking for E-F timing I commented out the line.

16:41: Next 2 lines set to Background.

16:49: “after all” instead of “afterall”.

17:37: It might be better to start the Note at the same time as “Oh, I’m first…” as it’s lots to read in a short space of time. I kept what E-F did though. Maybe a slight improvement for the future.

19:21: Pretty sure there are 2 spaces between “increasing” and “wins”. Fixed.

19:31: Marginal but I set this to Background.

Next Episode Preview: E-F had a lower font here to help fit due to the website text but since that doesn't exist, kept at font 25 with normal text wrapping.

Episode 28

2:43: Capital for "Saturdays".

5:58: Took the capital off "Morning".

7:49: No reason not to put this line to Background when the next line is.

10:14: Space for "Mr. Ogata".

18:07: Slightly different timing to E-F with the "Yes!" but the timing gabest11 subs have means you don't have overlapping subs.

18:49: Not actually subbed by E-F but kept in.

Episode 29

3:28: Space for Mr. Ogata.

4:13: E-F did "Oh" here but "I see." from gabest11 subs fits better.

4:39: E-F overshot the "Tropical Fish" sign by 2 frames. Fixed.

5:29: "fishfood" to "fish food".

6:47: "get on" changed to "get in".

7:34: No capital for "tell".

7:55: "earlier's" to just "earlier".

9:59: E-F having some fun here, I put it in!

10:01: Set to Background.

11:25: Set to Background.

11:32: Funny little E-F interaction here has been put in by me. One of the things you miss if you don't pay close attention.

13:22: Full stop added to the end of the sentence. No reason not to have it here.

13:37: Another funny E-F interaction. The prior line to this has a . after "Honinbou" but E-F does not. Probably should have it.

13:51: Another space for Mr. Ogata. I'll stop noting this down soon… basically every Mr.something will have a space.

15:50: Capital for Saturday.

16:43: Changed to "Hokkaido…" gabest11 subs had this and with quick searches, it seems most accurate.

17:02: Same as 16:43.

18:06: E-F "overshot" the Note by 2 frames. Fixed.

18:07: Set to Background.

18:28: Also set to Background.

22:12: E-F had a typo in the Igo sign. "On March 23rd, 20002". Fixed.

22:12: Also one of the first times E-F has applied fade, at least for Igo.

22:18: E-F had a sign that I'm pretty sure they forgot to take out. It's all green "From Miyakojima" but it just repeats what actually fades in seconds later all nicely spaced out with correct colours. Took it out.

Episode 30

Reminder: At the 8:00 mark in episode 29, maybe it should be Thinking Background style since the recap on this episode is also Thinking Background. I don't think I'll change it though. That whole scene in episode 29 is pretty iconic for me. I still remember when I first watched it so I'll keep it the same.

3:00: Japanese Go Institute sign. I tried to improve the scrolling compared to E-F. They also ended the sign too early by 1 frame so fixed that.

3:29: Really close if this should be Background or not. Decided not to.

6:38: Set to Thinking Background.

11:17: Not actually subbed by E-F but makes sense to have the "Okay." that gabest11 subs had.

12:29: Set to Background.

Episode 31

4:04: Set to Sai style.

6:50: Set to background.

7:33: Set to Sai style.

8:10: Removed the space before the ending] in the Note to be more consistent. **gabest11 didn't actually have the second note "But if you…" so again why rechecking everything has to be done.**

8:27: E-F did some "Good luck!" colour I have not seen before. Seems strange to make it for just one line so set to Background. If it pops up in more episodes, I'll make a style.

11:12: gabest11 subs started this line much later. I quite liked the E-F timing so I matched that. It starts on Tsubaki's "Ahh". If you do want gabest11 timing, I would recommend starting it 1 frame earlier as commented in the script.

19:09: There's 2 frz tags for "Japanese Go Institute" in this episode. It looks like the first was ok (I matched it really close to 345) but the second seems slightly off and more upwards. I kept the frz but changed the height.

19:09: I couldn't get an exact font size match for "Second day…" text. Nothing seemed like an exact match but fs24 is pretty close. Update: Seems to have fscx99 applied which I did. Now a really good match.

22:22: The Yuuki and Mai texts had fade ins when moving off screen but since the actual text doesn't fade in, I removed this.

22:26: Much better fade in and out timings for the Note to match text.

Episode 32

2:09: One of the first examples of a fade in for the main anime. E-F was slightly too early on the fade in so fixed that. I also couldn't get an exact match on font size. Likely off by 0.5 or so.

5:19: No capital for "study".

9:44: This line actually starts early on E-F when Sai sort of sighs but the gabest11 timing makes more sense.

10:04: E-F didn't sub the "Yeah." I thought about taking it out but meh.

10:18: E-F missed out g in "going". Fixed.

10:21: Set to Background.

11:46: Set to Background.

13:04: Set to Background.

16:03: Another example of where 23.5 font looked like an exact match to E-F but 24 is a better "visual" match for Blu-ray. Also colour picked to match the sign better.

16:56: Set to Background.

18:31: Maybe should have set this to Background but kept what E-F did. Mainly since they aren't talking to anyone so it's easier to know who is actually speaking.

18:59: This definitely should be Background.

19:41: The "Yeah." was not subbed by E-F but kept it.

20:13: Set to Background.

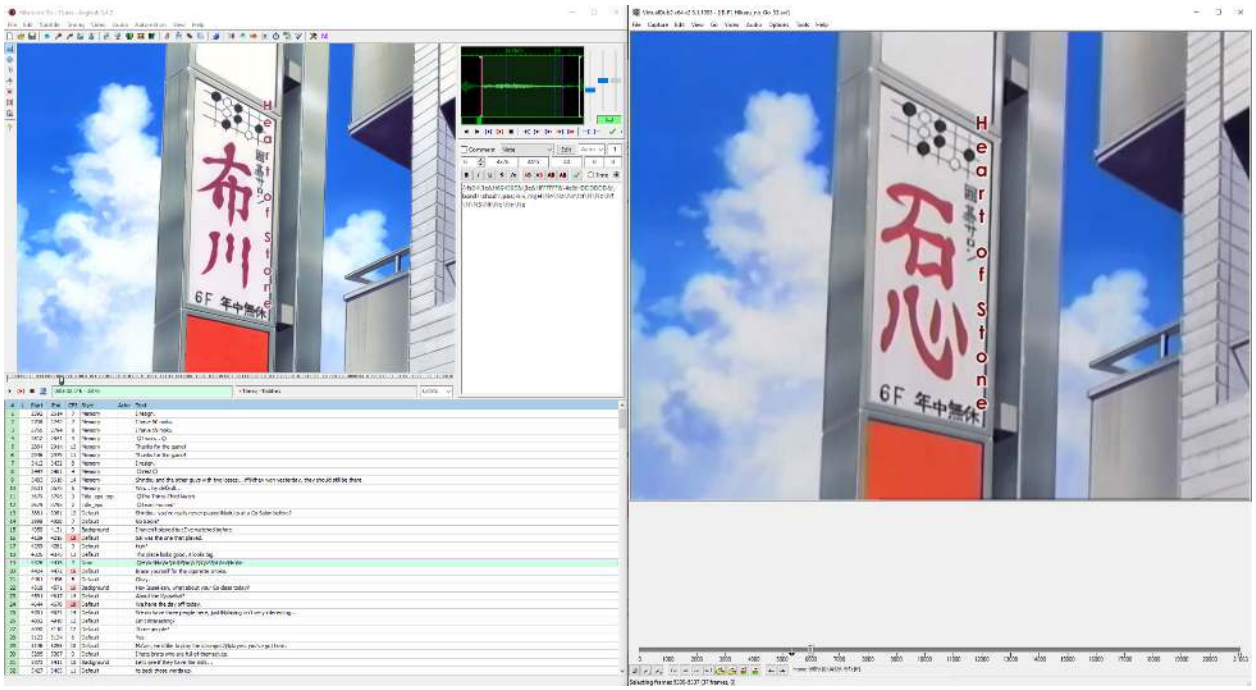

22:30: Igo. Pretty sure the line: "Okay last move, do it with energy!" wasn't on long enough so fixed that.

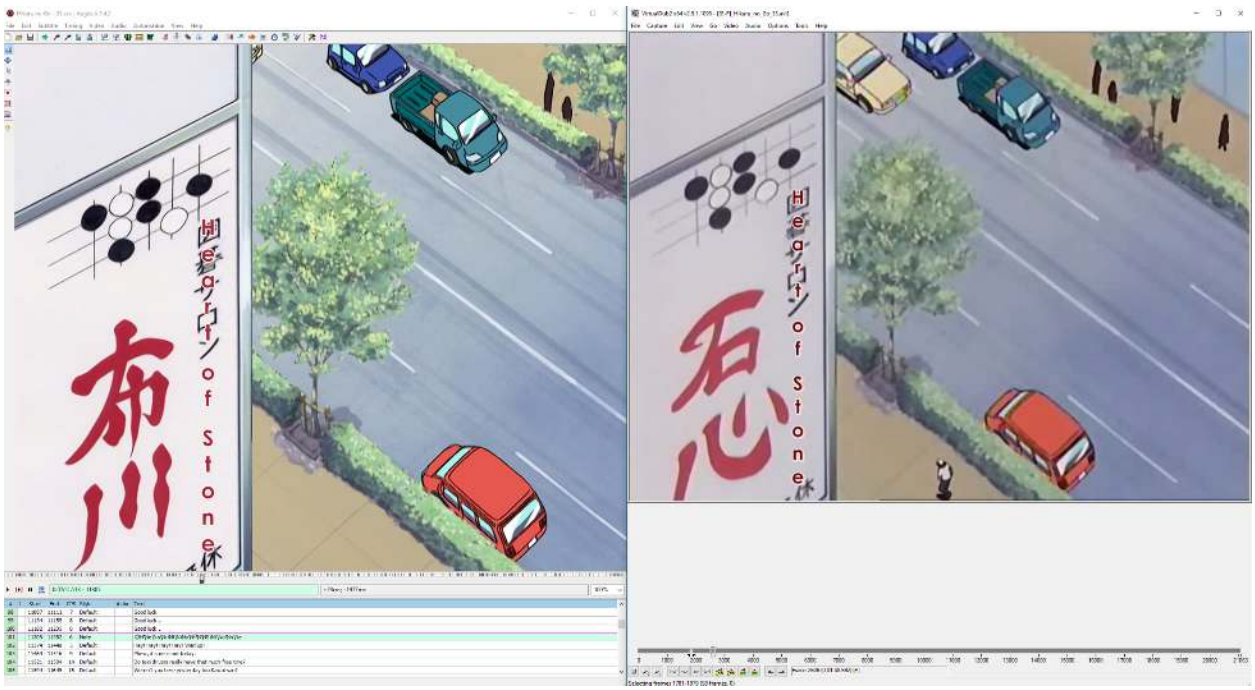

Episode 33

Interesting change in this episode by E-F. The recap was styled with Memory. I also did this just wanted it known.

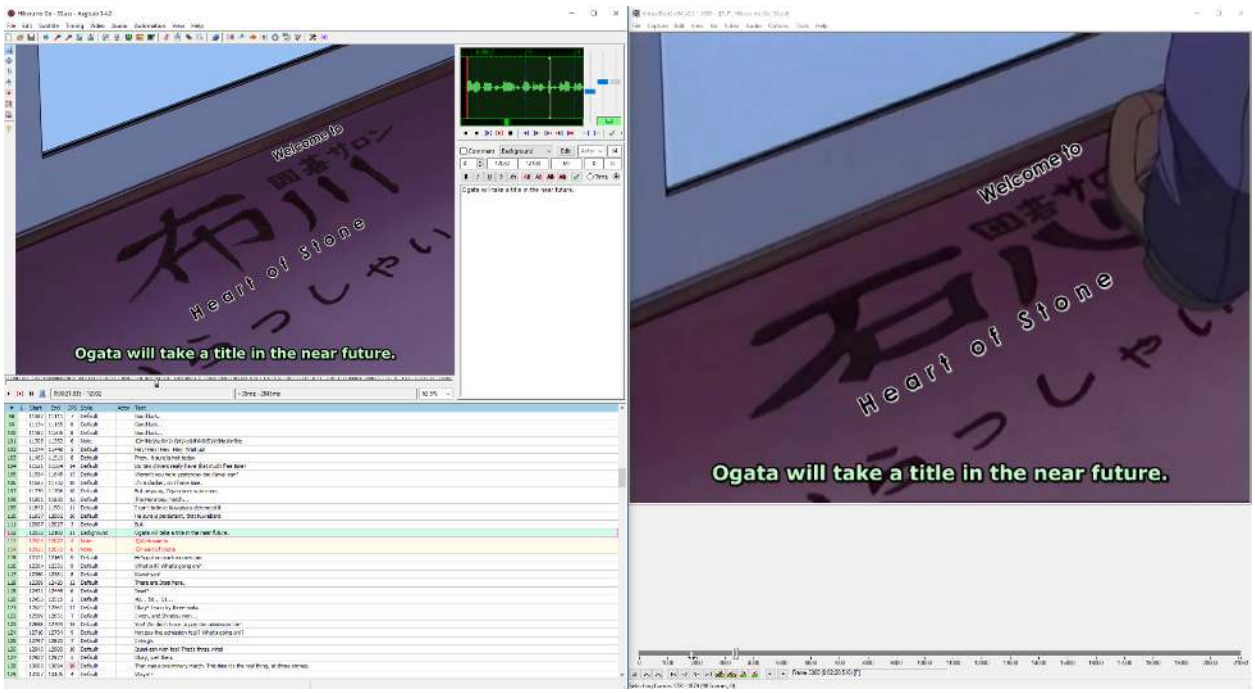

4:14: Just like episode 32, some small things like “Yeah.” are not done by E-F but no harm in keeping them in. Just another great thing about having subtitle files, such an easy change.

7:51: Bonus: When doing the sign (gabest11 missed it) I actually noticed they changed the Kanji compared to the TV broadcast. The Kanji sign at 3:02 is also different.

8:21: Bonus: The rug Kanji also changed. I also felt like the frz by E-F was slightly off so I tried to correct that. Font sizes and letter spacing were hard to match due to this. I chose a font of 30.5 because for the “Lotsa Sushi” sign later, it was a really good match. Letter spacing changed though.

9:27: Full stop added.

12:08: I was really close to taking this off the Thinking style that E-F did. He's visibly speaking.

12:29: Maybe the note should say "unreasonable moves" instead of "unreasonable move".

13:32: Marginal Background here.

17:18: I kept what gabest11 subs had. Not just saying "Insei?" again as he clearly says more than just that.

17:46: Typo. E-F had "becuase". Fixed.

Episode 34

3:14: Much better scrolling for the sign compared to E-F. I'm getting better at it!

4:33: E-F missed out a . for Ms.

5:23: Set to Background since everyone is saying "Good luck."

6:29: Capital for "Huh?".

7:30: Added "a" for "make a bad".

12:20: "grandson".

15:16: E-F was way too early on this line by a good 9-10 frames. Fixed.

15:53, 15:56 and 16:53: Set to Background.

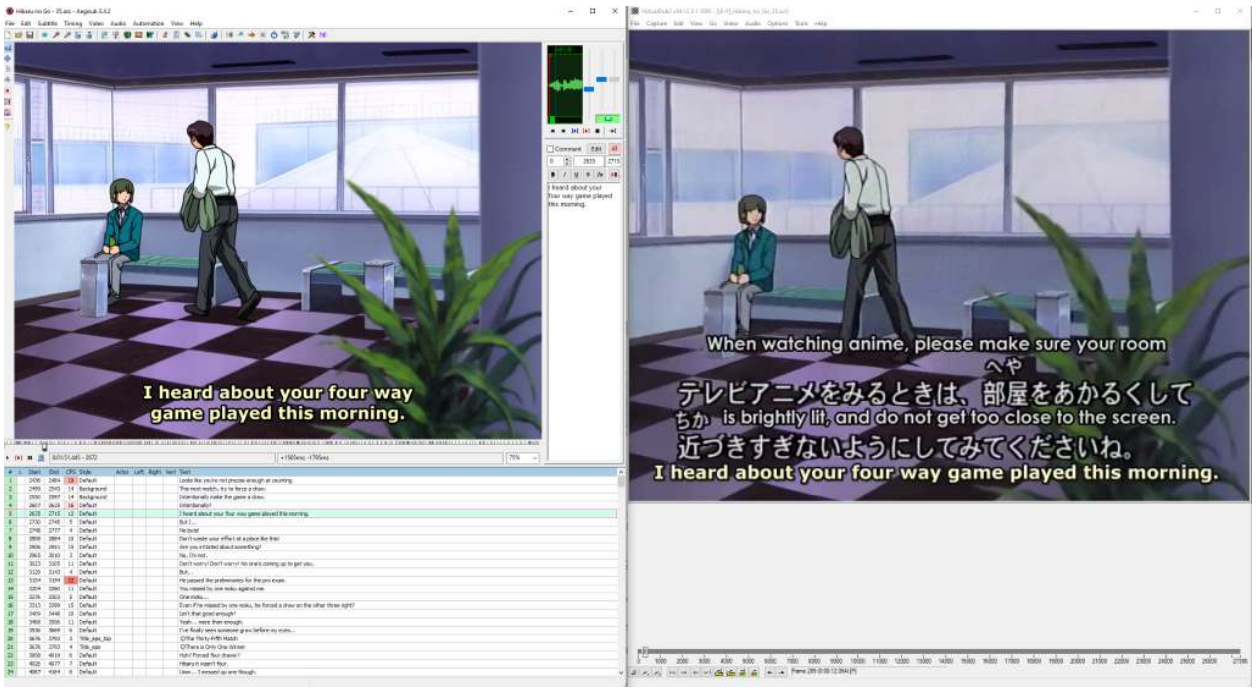

18:06: Think they just forgot to set this to Background since all the other lines are Background. Fixed.

20:16: E-F didn't actually sub "Isn't that enough?" (gabest11 subs had it) but since the guy directly responds about that, I kept it in. **Update: The episode 35 recap by E-F does actually have this so likely just an error. Good choice!**

22:16: Igo. Pretty sure E-F chose different font sizes for the subs here. Likely to make the titles easier to read. Tried to match them.

Episode 35

1:49: Font size change by E-F.

If you font 25 that, you can't fit it on one line even with 0 margins as I've been doing. Font 22.5 was a perfect match on overlay. They seem

to have only done it for this line. Probably because of the "When watching anime…" text showing up. I kept it at font 25.

4:32: Same problem as the dual 25/26 episode. They forgot to unbold the Thinking style. Fixed. If it happens more in this episode, just know it's been fixed.

6:36: Didn't know what to do here, both options had merit. E-F did "<Korean Dialog>" for the following lines but the gabest11 subs actually subbed it. For the restoration feel I'll change it to what E-F had.

6:45: This is borderline Background. I know why they did it so I kept it.

8:41: In the Note, E-F had extra spaces between "Note:" and "In". Fixed.

9:34: "Huh?" wasn't subbed by E-F but kept it in.

10:16: Set to Background.

20:03: Set to Background Thinking.

This is the last Igo that has the old intro. For episodes 1-35 I matched every Igo intro but from episode 36 I put the last Igo intro that R-F did (starting episode 44) till the end. I think everyone will agree it looks much better.

22:12: The first "Honinbou Shuusaku" sign was slightly off screen on E-F so I just applied a vertical 5 with an2. Much better.

22:20: E-F had "Shusaku" in the sign. It should be "Shuusaku" so I fixed it.

Next Episode Preview: Mistaken Bold Italic fixed.

Episode 36

5:45: This line isn't actually in E-F. They just put "This match touches me in the heart." for both lines. However, Sai is clearly repeating some of that line with "This match…". I kept what gabest11 subs had for that reason but just styled properly.

Igo: This is the changeover episode for Go Go Igo titles. With lots of help from IIbx, I put the title card that starts episode 44 starting here on all future episodes. It looks much better and I think E-F/R-F would have done the same given the chance.

Episode 37

3:50: Spaces for "Tsubaki… san…"

7:54: Mistake by E-F. They set the line to Thinking when it should be Default since Shindou is directly speaking to someone. Most likely made the error since the previous line was Thinking.

8:15: Could easily do this on 2 lines but just kept what E-F had (3 lines).

9:50: Another line not subbed by E-F which got kept in. No reason to remove it I guess.

22:12: Typo in Igo sign. "Yuki" but of course should be "Yuuki". Fixed.

Episode 38

3:00: Could easily do this over 2 lines but meh.

11:19: Capital for "But…"

11:20: "grand pa" to "grandpa"

12:54: Set to Background.

13:17: Another possible 2 liner.

17:25: “some how” to “somehow”.

Episode 39

2:57: Another episode where they forgot to unbold the Thinking style.

3:11: “be” added in to make more sense.

4:57: E-F just had “grab a win” but “grab another win” from the gabest11 subs fits better in this context.

6:40: Set to Background.

6:55: Just like episode 35, they chose to change the font size for this specific line. Most likely to fit it in two lines. I did do this one.

7:16: Set to Background.

10:11: I’m really happy with this. Took so long to do but it’s such a great scene! One, two!

10:40: “afterall” changed to “after all”.

10:54: Waya set to Thinking.

12:17: Set to background.

16:58: Arguable if this should be set to Background (obviously should atleast be thinking) but I kept what E-F did.

22:33: In Igo, I think E-F made a mistake. Mai-chan says “Here.” but gabest11 subs had “Okay!”. I think that would make more sense. I think they just got the timing wrong as seconds later Mai does basically say “Here”. I made those changes.

E-F main subs have been finished!!!!! WOOOOOOOOOOOOO!!!!!

Episode 40

Title changed to Real-Fansubbers presents and everything else the same. This gets kept till episode 43 when R-F changed the intro.

The opening and ending also changed fonts. It appears like they also bolded the openings/endings. They also did the same for 53 and 58. This includes the “Yukari Umezawa’s Go Go Igo!” logo in 53 and 58. Since the updated Igo! logo has been put from 36 onwards, you wouldn’t see it but since they likely would have done that, also bolded in episode 40.

6:54: Was unsure about the colour R-F picked here but since the sign is White, I played it safe and also made it White.

12:31: Same as 6:54. Also anyone directly comparing will notice these signs are off by approx 4-5 pixels or so. This is discussed in general thoughts about placement. In short, alignment (or pos 320 in this case) makes the most sense to have a more “universal” sub.

15:23: gabest11 subs had “Really.” but R-F had “Yeah.” so I changed that back.

15:59: R-F had this as Thinking but Hikaru is speaking so I didn’t style. They likely did it since the next few lines are Thinking and just forgot.

16:31: Makes sense to set this to Background since everyone is saying “Good luck.”

The ending Igo was different to the TV broadcast. They did have some of the same footage but pretty sure the dialogue is different. I kept what gabest11 had subs wise but did the next episode preview as R-F. Also did all the signs for what was included with some basic translation. Had the “to be continued” text from episode 39, just pushed back 12 frames for sync and coloured differently to fit the episode. I'm really happy with this.

Episode 41

14:20: R-F mistakenly set this to Background. Fixed.

22:21: Igo sign. R-F forgot a space between “who” and “were”. Fixed.

Episode 42

1:44: Full stop added.

7:10: R-F styled this as Thinking but Hikaru is speaking so decided not to.

9:18: R-F did Thinking but I frame advanced and as Hikaru turns away, his mouth opens. For that reason, I didn’t do Thinking. Same with the next line “Sai?”.

Igo: Very interesting that even in episode 42, R-F still has the style Note of E-F (Century Gothic). It’s done for the “Money for a cat” note.

Episode 43

THIS IS THE SECOND OUTLINE CHANGE EPISODE

From episode 43 onwards, R-F decided to change the thickness of the lines/shadow. If it was only for a couple of episodes I would have not done it but they basically keep this change all the way up till 73 (58 and 64 being exceptions). Both 74 and 75 seem to go back to what it was before. gabest11 originally had a 1.3 outline for everything but when asking llbx about colours for the Memory style, they mentioned it’s a 1.25 border.

3:32: R-F set this to Thinking when it should just be Default.

9:04: I know why they set this to Background but since it starts with the person talking and then goes off screen, I kept it as Default.

9:58: R-F didn't sub "Bye." but kept it in. I just tightened up the timing from the gabest11 subs to not overlap to the next scene.

12:48: Set to Background.

16:57: Set to Thinking Background. The episode 44 recap also does this so it makes the most sense.
18:54: Set to Background.

19:34: Wasn't subbed by R-F but kept it in.

Igo: This is the first time in the entire gabest11 subs that they matched the ending Igo by R-F.

Igo signs border and shadow thickness: Set the Igo signs at 1.25 thickness to match the main dialogue. This is also likely the last Igo episode to have shadow. Episode 44 has some different bord values and after that it's really hard to know if shadows are there or it's just the encoding quality.

The main reason I did this is because in episodes that should have a 2 border and 1 shadow like 58 (or 64/74/75), I definitely can't see such a thick shadow. There does seem to be white shadows on some of the "To be continued" signs or episodes 49 and 50 which I did do shadows for since it was really obvious but that's it. If there are shadows, I've left each sign with a 4c and shad tag so relatively quick to change each episode if needed. I gave additional comments in the script files if anyone wants to read them.

Episode 44

14:33: “for his” to “for him”. It fits better.

16:29: Not a change, just a note really. The signs for this episode have borders I can’t properly pinpoint and I doubt they changed the outline per sign. For this sign, 1.5 outline seems ok but then visually a 1 outline looked better for the sign at 2:34. **Update: Now that I know about bord1.25, this all makes sense why I was so stuck.**

16:56: This and the next few lines set to Background.

17:38: Typo in gabest11 subs. “Fifty-fifth I think.” but it should be “Fifty-fifty I think.” Fixed.

18:24: Set to Background.

18:56: “Nevermind” to “Never mind”.

19:47: R-F forgot to style this as Sai. Fixed.

19:56: Set to Background.

20:01: More lines set to Sai as R-F seemed to have missed this.

20:10: Set to Background.

Ending 4: R-F changed the English lyrics in this episode (1 line). From “I learn what vanity is” to “I learn how vain all my efforts are” There are also slight changes in 45/46 like “departure” to departures” then “I'm not like I was before” to “I'm not like the way I was before”. Finally, “no matter what the future is.” to “no matter what the future holds.” Made all those changes on a per episode basis.

Igo: This is the episode where R-F decided to standardise the "Yukari Umezawa's" intro. I put this version from episode 36 onwards.

Episode 45

2:28: Was really close to setting this to Background but in episode 44 it's not set to Background so left it as is.

5:26: Set to Background.

5:55: Being really specific here. The line: "Is that right, Touya!?" but in the recap for episode 46, the line is "Isn't that right, Touya!?". Maybe it makes sense to choose either one but I don't know which one would be better so I kept them as is.

6:23: I was going to set this to "A warm-up match?" but kept the same as R-F of "A warmup match?".

6:47: R-F had "in a bind!" and gabest11 subs had "in a pinch!". The character does actually say pinch so I kept pinch.

17:24: Set some lines to Thinking Background.

Igo: Fortunately the subs have continued to be identical to R-F since 43 which is great. Also interesting that this episode is when R-F started to do Background style for Igo when the Go board is shown so I just styled when required.

Episode 46

This is one of the few episodes where the ending, igo and next episode preview isn't the normal frame numbers for sync. Other examples are 52 and 58. Fixed via shift times.

1:53: See episode 45 5:55.

2:33: Title. This is most likely the only episode where the updated title cards are a problem. The font size of 42 is too much that it goes off screen due to the length of the episode name. I set it to a font size of 36 which looks fine. I doubt anybody would have noticed unless I stated that. I still stick by the decision of updating all the title cards to the later R-F versions.

9:54: Set these lines to Thinking Background.

13:09: Set to Background.

15:08: Set to Background.

19:24: Set to Background.

22:23: R-F forgot to apply "Background" to "Here.". I normally wouldn't do this but since it's been the theme of Igo for the recent episodes (and every other line has it, made sense).

22:41: Small typo in gabest11 subs. "Agajn". Fixed.

23:22: Typo in gabest11 subs. "Hukaru". Fixed.

Episode 47

2:44: I think properly colour picking the NcDonalds sign looks better.

10:16: Both lines set to Background. The main reason for doing this is the recap in episode 48 also sets it to Background.

11:31: Set to Background.

12:43: Some slight timing changes (talking frames here) to stop a triple line that R-F had.

14:05: Set to Background.

15:26: Not subbed by R-F but kept it in.

15:28: Subbing here on the gabest11 subs seems better so kept that (2 lines total). Basically “Let’s see…” earlier and then “Here…” added.

15:32: Set to Background.

19:08: Set to Sai. Next 2 lines also.

22:24: R-F forgot to fade out the “Only 32 pairs can go to the finals!!” sign. Fixed.

22:43: Typo by R-F in Igo sign. “elminated”. Fixed.

Episode 48

The title card in R-F still says “The Forty-Seventh Match” from the previous episode but this should of course be “The Forty-Eighth Match”. Fixed.

2:08: For ease I just copy/pasted all coordinates for the Notes from episode 47 since it’s a recap. R-F actually slightly repositioned these for episode 48 by a couple of pixels (most likely because they differ due to TV broadcast capture) but for Blu-Ray it seems to be an exact match. I also changed the timing of the zoom to be in line like 47 as it’s much too slow in 48. 47/48 text placement isn’t an exact pixel match but it’s hard due to the differences. You can see much more of the right side of the newspaper on TV broadcast.

2:09: R-F did an8 tag in episode 47 for this but didn’t for episode 48. It’s really needed or else it collides with the Shindou text on zoom in.

3:57: R-F set this to Background but I don’t think it should be. Maybe it was a mistake since the next 2 lines are and should be Background.

8:00: R-F did “H-Hello.” but didn’t actually sub from the first “ko”. gabest11 subs did this so kept.

13:42: Set to Thinking Background.

16:52: Set to Thinking Background. Also the next 2 lines.

Episode 49

Note: The source video for 49 and 55 had some small video glitches in the first second of the intro. If you would like more information and how this was fixed, look here.

4:10: gabest11 subs had “of him only” and I agree that fits better than “him only on” as R-F had so changed that.

4:19: Typo by R-F. They had “instuition” but it should be “intuition”. Fixed.

5:26: Not a change, just interesting I guess. This is the first fade in/fade out Note by R-F for extra information. It’s also probably the end for any Century Gothic style notes by R-F with a slight colour change.

7:08: R-F had 1 extra space here. Same with 7:50. Fixed both. Maybe they did it because it’s Go moves but this isn’t the case in other episodes.

17:52: gabest11 subs had “wanted” and R-F had “want to”. Either could work depending I guess (e.g. if Shindou is maybe talking about a future match) so to be closer to R-F, I chose “want to”.

Go Go Igo title card: R-F mistakenly made the Go Go Igo titles extend too much by 1 frame. Fixed.

Episode 50

10:12: These signs were really hard to do because there are different fscy/fscx tags. I did the best I could:

10:52: Maybe set these lines to Thinking Background. R-F was just Thinking.

11:35: Also consider changing this scene to Thinking Background. I decided against it because there is some back and forth of Akira being on screen depending on which line it is so left all as Thinking.

12:11: A good example of why I had to check the gabest11 subs for accuracy. The “Wow” part isn’t actually subbed on gabest11 subs but is for R-F. Fixed. There were some more like this in previous episodes, mostly when it was like an “Oh” or “Umm” etc.

12:52: Set to Background.

Episode 51

I mention this at 4:35 but want to expand more on it: blur. With the low quality nature of the R-F source video, it's been really hard to know when they started to blur signs (or if some signs even have it at all). If you look at episode 50 10:12 for example (above screenshot) I don't think that is blurred so this is likely the first episode they did any form of blurring. When talking to llbx who helped with signs, they would apply 0.8 blur to most things which even if R-F did not do this, it really helps for some things like text on documents. Not everything after this has blur, just when it felt right to add it.

Note: With the addition of blur, this means the next episode preview in episode 50 also had 0.8 blur applied. The other exceptions are in episode 49: blur1 has been applied to the "PRESS ROOM" door signs as was really needed and "The Hint to Tsumego" book has blur0.8 to fit better.

2:17: Applied a slight frz to more match the slope for the Sign.

4:35: One of the few signs I've really noticed that R-F applied blur. They went pretty extreme with blur here. It's probably around a value of 2 which is what I picked.

14:01: R-F had "taking his out anger" which is wrong. "taking his anger out" makes more sense and that's what the gabest11 subs had.

15:06: "embarassing" to "embarrassing".

20:01: "Thanks." wasn't subbed by R-F but should be in. That's what gabest11 subs had.

Slight change in the Igo. Much earlier camera angle when "Yup." is spoken compared to the TV broadcast. The Kifu handover to Mai is

also much shorter (no transition). The sign "If you replay a Kifu.." also appears later.

Next Episode Preview: Didn't exist for R-F really besides the very last line. gabest11 subs are good though. Just styled one line as Sai.

Episode 52

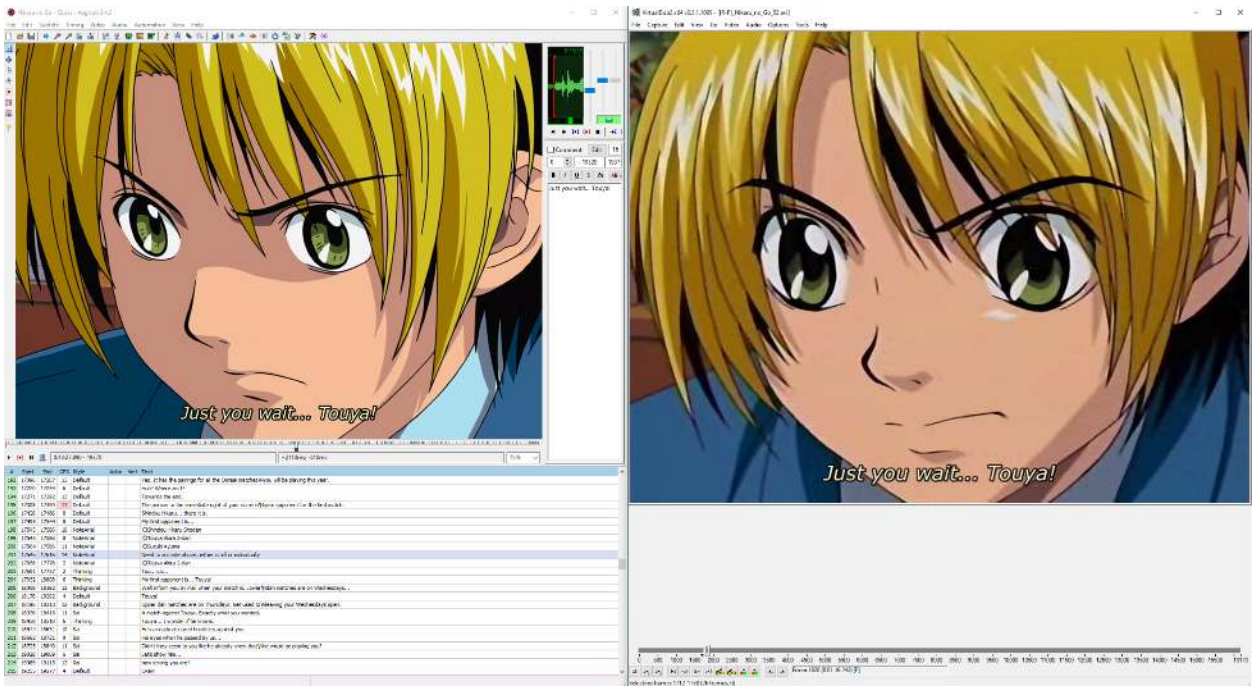

Like episode 46, the chapter sync that's basically worked for every other episode, failed. They were off by 2-3 frames each. This means I also changed gabest11 ending to 29783 via Shift Times.

3:03: I mentioned this slightly in episode 49: 5:26. Colour difference in the Note. I couldn't tell on 49 if there was a shadow, and even due to the contrast with the yellow background, I still can't tell. Normally Notes don't have shadow so putting this to 0 is fine. It also makes sense to put Note border to 1.25 to match

Also at 3:03 the wrong "your" in gabest11 subs. It should be "you're" as R-F has.

5:50: Set to Background.

13:25: Not a change, just a big difference between the TV broadcast and Blu-Ray that I noticed. They completely redid Shindou's face (most likely because the TV face was his younger self and didn't match).

16:15: Set to Background.

Igo: gabest11 subs had a typo. “thing along with us” when it should have been “think along with us”. Fixed.

Episode 53

As stated in episode 40, bold for the openings, endings and Go Go Igo! Logo. This is the same for episode 58.

5:18: R-F didn’t actually sub “Ichikawa-san” but was in the gabest11 subs. It makes sense to have it as every other time it’s done. Guess they forgot.

6:37: I really feel like this should be “Shindou?” rather than “Shindou.” but kept it the same.

8:51: “Ehh?” was not subbed by R-F but was in gabest11 subs. I don’t think it needs to be subbed so commented out. I should also say the previous line gabest11 had was “You can play as much Go as you'd like even here.

Right, Master?”. This is slightly different to R-F which is “You can play Go as much as you'd like even here. Right, Master?” so that got changed to match.

Episode 54

14:50: Not a change, just a note on something. R-F did bold and italic for this. I was going to just set Background but then she is on screen so wouldn’t make much sense. I kept it as is.

14:52: The second “Yes!” wasn’t subbed by R-F but kept it. Also applied Bold Italic like 14:50 to “I don’t know” as R-F did.

15:08: Typo by R-F. “frenquency”. Fixed.

16:25: Pretty sure R-F did this wrong. The “Really?” is subtitled when Hikaru does a sort of sigh but it makes way more sense if this “Really?” is subtitled for the mother in the next scene. That’s what gabest11 subs had and I agree. Maybe it’s just a mistiming by them.

18:17: “Yup.” wasn’t subbed by R-F but kept it in.

Episode 55

This was such a hard episode to do, probably the hardest in the entire anime. So much stuff to match well but it looks good. This is one of the few episodes not to have the standard 0.8 blur as I felt like blur1 helped match the computer screen text slightly better.

As stated in episode 49, the source video in 55 intro also had some small video glitches. Fixed this. Refer to here.

9:41: Added a full stop.

18:56: “Hold on…” isn’t subbed by R-F but was in the gabest11 subs. With my very limited Japanese, that is probably what he is saying. I know why R-F did this. It’s because the previous line becomes slightly too short and they used that time to extend it. I just amended the timing and still easily fits both in.

19:09: The “Where? Here?” line timing is also slightly different on the gabest11 subs but it seems fine. Not doing this timing and instead doing R-F timing is probably too short (even if it is two people speaking, one line is fine).

19:32: R-F started subbing this line from the previous group “sigh” but the timing on the gabest11 subs makes more sense.

Episode 56

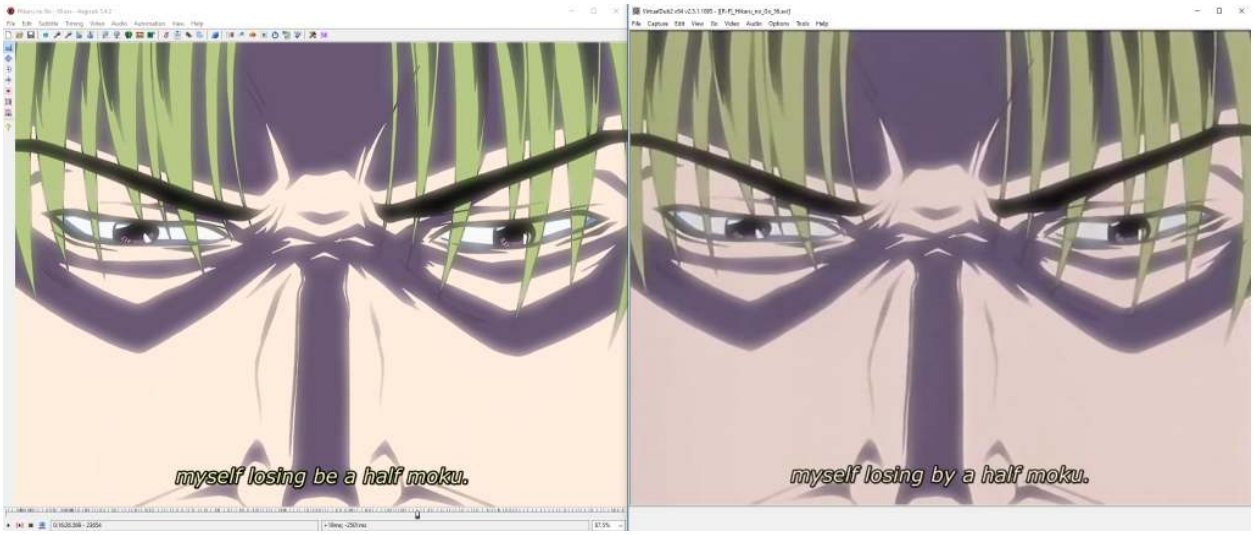

Title: Just like episode 46, the main title font might be too big. I set it to 38 from the standard 42.

9:22: Not a change, just wanted people reading this to know. Sometimes the gabest11 subs are out by a small margin (1-2 frames or so on starting) but the “I still…” line was out by 9 frames. Since it started immediately after “It can’t be…” something tells me they just mistakenly did a new dialogue line and forgot to do the actual start timing.

9:59: A far better scroll for the Wakajishisen sign compared to R-F (from 216 to 210 on the x). Also fixed the fade in to start on the correct frame (R-F was 1 frame late). I applied blur2 here as it matched pretty well. The white fade of the text was done by llbx.

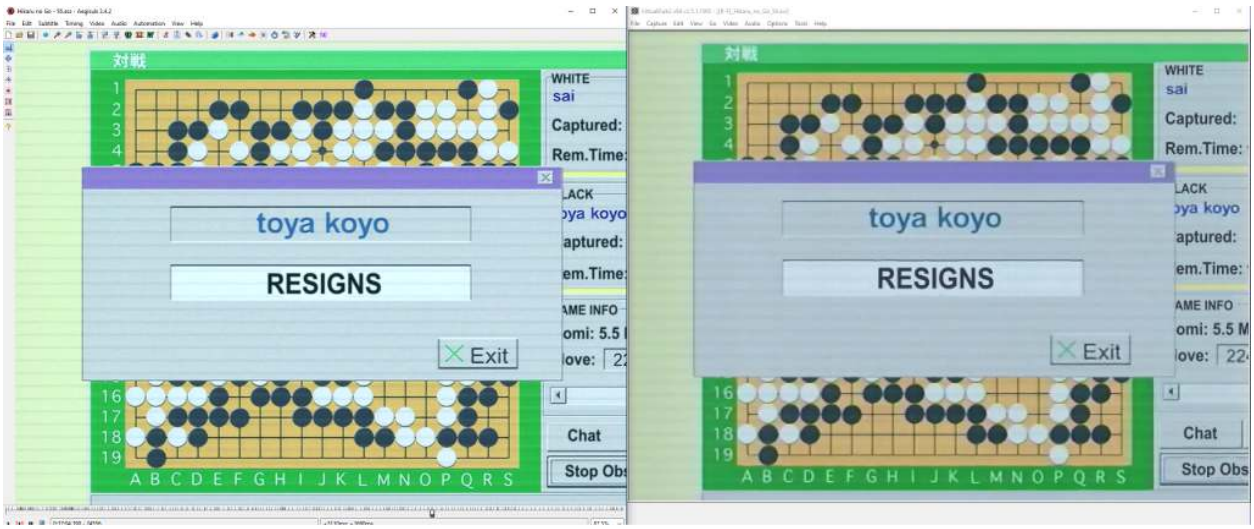

15:38: Second example in this episode of the timing being really wrong for “losing…”. Think this is a carbon copy of 9:22. It’s 12-13 frames too early and starts immediately after “The Meijin is…”

16:26: Why checking is so crucial.

Changed “be” to “by” and the timing was really bad, out by over 25 frames. Third example in this episode.

17:02: This was really hard to match because Blu-Ray is far more zoomed in. You can’t even see the end of the 2 on the moves counter but on TV you can clearly see it and some of the next number. Best I could do.

17:30: 4th example of bad timing. Was early by about 7 frames.

Episode 57

Just like episode 56, this episode also suffers from bad timing (as early as the second line being off by 15+ frames). I tried to fix most of it (some examples below). Another case of they did a line but forgot to set the start time properly.

3:45: Set to Background.

5:18: Small change. gabest11 subs had “in Weekly Go” but R-F had “on Weekly Go”. Since that’s a magazine it makes more sense to be “in”.

9:48: 2 instances of really bad timing here fixed. “There is someone connected to Sai nearby.” and “or is it one of the other people that visited him?”. Second was off by approx 20 frames.

10:31: “Is it Shindou!?” was off by over 30 frames. Fixed.

22:28: In Igo, R-F put the “Komi…” line smaller (font 24 most likely). Probably to more fit it on one line due to the sign. Made the same choice.

22:35: Small typo in gabest11 subs. “Thier”. Should be “their”. Fixed.

22:38: R-F had this as 2 lines but gabest11 subs was 1. I kept gabest11 subs because it was already a 17 CPS and R-F way meant you had to take frames out between. I think most people will agree it’s easier to read (especially when the translator note is also included).

22:49: Another font 24. Likely due to the sign. Included.

Bonus episode 53/57 info: I came across two episodes that I've never seen before on archive.org [e-f&force]_-_Hikaru_no_Go_-_53 and [e-f&force]_-_Hikaru_no_Go_-_57

It seems that Elite-Fansubs did indeed sub more of this anime (even when they apparently stopped at episode 39) with a group called AnimeForce. The only two episodes I found are on that archive page. I thought I would show some differences.

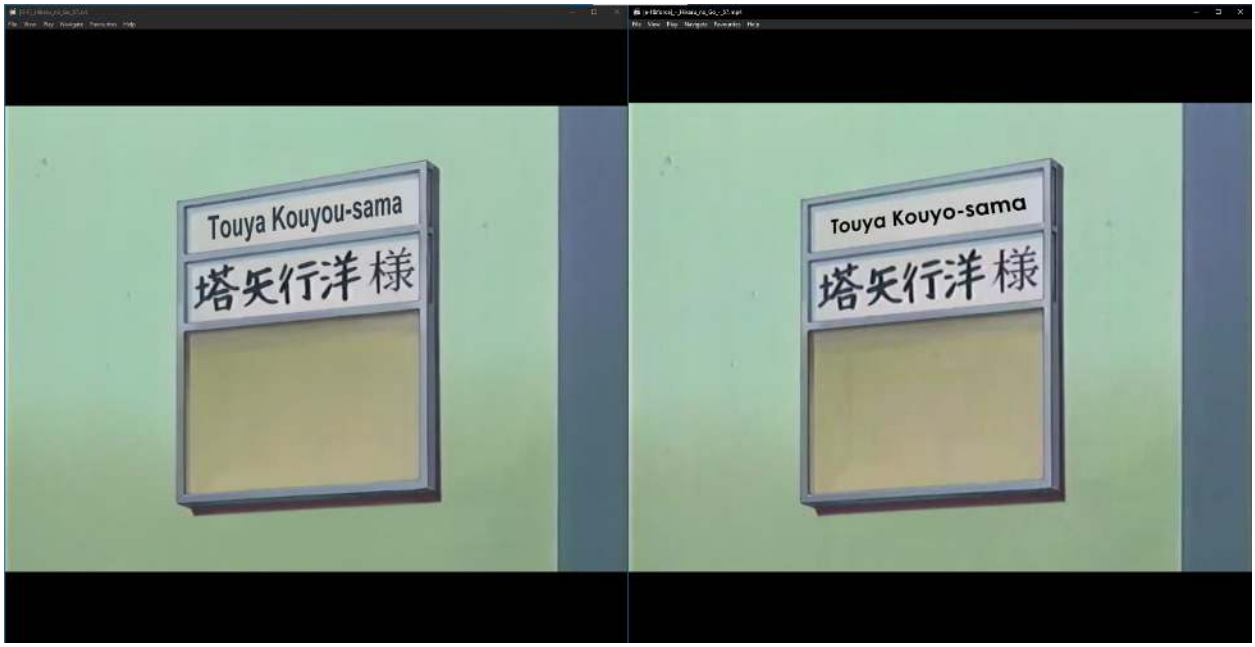

R-F (left) vs E-F/Anime Force (right)

The translation and karaoke are also different. Sign comparisons:

R-F (left) vs E-F/Anime Force (right)

R-F (left) vs E-F/Anime Force (right)

R-F (left) vs E-F/Anime Force (right)

As you can see the signs aren't as good. In episode 53, E-F/Anime Force didn't even have the sign:

R-F (left) vs E-F/Anime Force (right)

For these reasons I decided not to look into them further and solely focused on the versions that are widely available/people remember (1-39 by E-F and 40-75 by R-F).

Episode 58

R-F actually went back to normal outline (2)/shadow (1) for this episode.

Another super rare example episode where the ending, igo and next episode preview didn't start on the correct frames. Ending set to 27983 (not 27984) via Shift Times. 46 and 52 are also like this. The "Real-Fansubbers Present" intro was also shifted back by 1 frame to also match on these 3 episodes. The karaoke timing seems slightly wrong now (e.g. a line bleeds over to the next frame) but I can't tell if it's just visual or not because the timing of the audio still seems ok.

2:27: When doing this sign, I noticed R-F seemed slightly off on the frz (345 vs 346 frz). I think it looks better like this:

5:07: R-F had Kurata speaking as Background but he's basically on screen when the line starts. Set to Default.

6:43: There are other examples like this in the subs that I fixed but I just wanted to give a clear example as to why I went and checked all this:

R-F is of course right. It should be “you’re” and not “your”. Fixed.

6:51: Adding “the” for “all the time” makes more sense.

6:54: “inconfident” I guess isn’t wrong but maybe “unconfident” here? Kept for now.

11:28: “about me saying” vs R-F who had “about my saying”. Changed it to my saying as it’s technically not wrong and closer to R-F.

13:15: I think this should maybe be “Do we have” instead of “Did we have” but kept for now since both gabest11 and R-F subs had Did.

16:24: Set to Background.

17:18: Pretty bad error here in the gabest11 subs. They repeated “He’s tough” twice. Fixed with what R-F had here: “He won't give me a chance.”

20:21: One of the cool things you miss about R-F subs if you rush. The slow fade in of the TV is a nice touch. I think I recreated it pretty well.

Igo intro: Set to Bold and shadow size increased to 1.5 for small text and 3 for Igo as it seemed closest.

22:14: Teacher Yukari and Mai Igo signs. One of the few borders in later Igo that is bord2 (probably because the main anime is also bord2). “To be continued…” is also a really thick border (likely bord3) on this particular Igo.

22:18: Igo. This is actually a font 23 line that R-F did (again most likely due to the sign). Made the change.

22:43: Another line R-F did over 2 that gabest11 subs have in just1. I’m keeping it as 1 because the timing on R-F is pretty bad. A good change.

NOTE TO SELF: THIS EPISODE HAS THE KURA SIGN COPIED INTO EPISODE 73 (3:55) BUT EPISODE 73 IS NOT BOLDED. THIS EPISODE (58) IS.

Episode 59

7:09: R-F was slightly late on this line appearing. Kept the timing from the gabest11 subs. The gabest11 subs were pretty bad overall in timing though, much too late. I tried to fix all that I could see.

7:30: Another line in gabest11 subs that was mistakenly not timed correctly. It was off by about 12 frames starting.

16:06: Fun fact: I actually color picked &H000000& as an exact match to the Blu-ray text. First time I've seen that.

18:10: gabest11 subs didn't properly assign the start time to "Hey… let's play…". Was off by over 60 frames.

19:22: Interesting one. gabest11 subs just had "for a hundred years" but R-F had "for a hundred forty years". Pretty sure hundred forty years is correct so changed to that.

Episode 60

gabest11 subs had the same problem as 56/57. Some lines were mistakenly not timed and started immediately after the previous line. I tried to fix all that I could see.

13:01: Pretty sure I should have set this to Background. The reason I say this is because 3 lines later, they applied Background to something pretty similar but didn't for this line. This keeps consistency for the scene.

14:34: Another early line on gabest11 subs not timed properly. Fixed. It was off by about 12 frames.

15:17: Another line in gabest11 subs that was badly timed. Off by about 22 frames, fixed.

15:25: You know what got fixed here… about 16 frames off.

17:51: Again. Torajirou line was mistimed by about 24 frames on gabest11 subs.

19:08: Again. Off by about 20 frames.

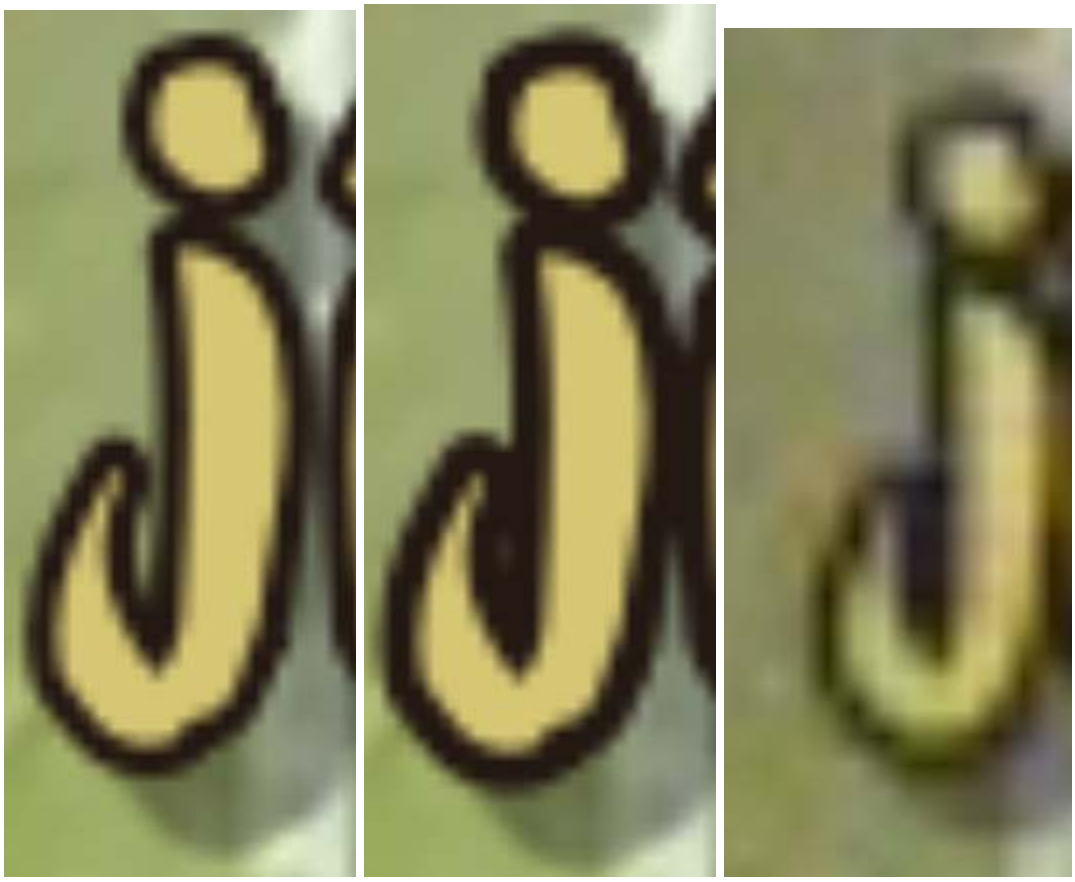

19:31: Typo in gabest11 subs. “I was fu…” but should be “It was fu…” as R-F has.

Igo: Typo in gabest11 subs. “Now there four” but it should be “Now these four” as the R-F subs have. Fixed.

Igo: Thankfully the gabest11 subs from 43-60 for Igo and Next Episode Preview were a match to R-F. Just slightly changed timing when needed for the most part.

Episode 61

Note: When llbx did the fantasy opening (based on 61) they originally had the romaji and kanji at bord1. It made sense to do that but after knowing about the main dialogue most likely being bord1.25 and it also being a slightly better visual match, I set romaji and kanji to bord1.25. Here's a quick example:

bord1 **bord 1.25** **R-F**

With bord1 you can clearly see a space in the middle of the j but not so much with bord1.25. It looks very close to R-F (I know really bad video quality) but it seems to be slightly more accurate.

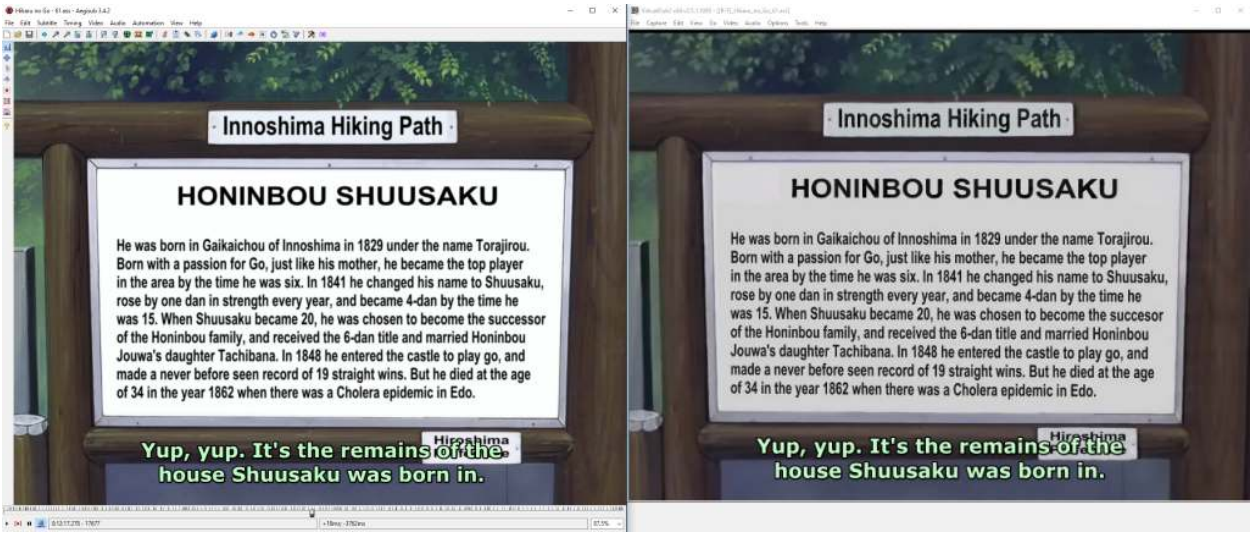

The thickness and shadow then changed in 64, further info there.

When doing the intro credits, I noticed that the TV capture is actually slightly different to the Blu-Ray. During the music credits (Nana Katase etc) they immediately end on the scene change on TV but for Blu-Ray, they actually fade out into the next scene.

I put the original position values from R-F (to the nearest half pixel) in comment lines in this script just in case anybody wanted them. 61Credits has been slightly changed in position to match Blu-Ray better. I did the same with the outro credits but for future credits, I'll just be putting positions for Blu-Ray. For ending credits, the x value isn't that far off so I left that as is and only moved y up by 2 pixels for each episode going forward.

I'm not totally sure on the 61Credits colour. I went with &HE7E4E5& since it was the text colour for the titles. Other choices could have been HE0E1E5 or even &HB3B2BA& (to match R-F) but as llbx said overall it's likely better to just match the Blu-Ray colour so stayed with HE7E4E5.

12:17: The plaque info was really hard to match. It looks like they have a very slight -frz on parts of the text (something like -0.05) but just left it all frz0. There is actually a typo in the plaque text. R-F has "succesor" but it should be "successor". Everything else is the same. I also set this to blur1 (instead of standard 0.8) since most signs in this episode are blur1 (e.g. gravestone).

The Shuusaku grave sign at 14:44 was really hard to match. On overlaying it seemed like R-F did frz356 but on Blu-Ray, it looked much too skewed so I decided to do frz356.5.

19:43: “I guess I'll go back to Tokyo already,” was timed much too early on R-F. Fixed. Some other lines earlier like “Kawai-san could you keep your voice down?” at 11:25 was late but only by about 3 frames. The last line of the episode “Kawai-san…” was also too early, fixed. In general this episode had some bad timing here and there especially when it was dialogue put together (like 11:25) so I tried to fix most of it.

Episode 62

Some very small changes in the Fantasy intro karaoke for the English lyrics. R-F removed a full stop in the following lines: 2nd (that will passionately sway the beating in my chest), 4th (nothing's going to change), 9th, 11th and 15th. Made those changes.

9:03: Fixed a typo. "A bluff? He's doesn't do stuff like that" to "A bluff? He doesn't do stuff like that"

Ending credits: Typo by R-F. Kawai-San is credited as Kenichi Oni when it should be Kenichi Ono. Fixed.

Igo: R-F TV broadcast was advertising the DVD so the Igo on Blu-Ray is completely different. I was going to leave it blank but when randomly checking the official release, that has hard subs. I frame timed those to Blu-Ray then did a basic “R-F style” version with all the signs and styled dialogue to Background (when required) as R-F would have done. Took the to be continued sign from episode 60 since it’s basically identical.

I also changed the subs slightly to be more like R-F as these official subs dropped honorifics. e.g. “Give it a try, Mai.” became “Mai-chan,

give it a try." I switched it about because generally in these Igo, R-F mostly always do the name first. There are some exceptions of course but it seems correct to do that here.

Also changed Yuki to Yuuki and gave "Yuuki-kun, what would you do?" an extra couple of frames as it was quite fast (from 84 frames to 88). I was using a 29.97 to 60 fps conversion table.

Episode 63

Just like 62, some small changes in the Fantasy intro karaoke for the English lyrics. R-F removed more full stops. This is all changed lines: 2nd, 4th, 6th, 9th, 11th, 15th and 16th. This now stays consistent for all other intros going forward (63 to 75). Made all those changes.

5:19: R-F had this as Background but it should be Thinking. Likely a mistake since the last line was Background.

Around 6:06 I was really close to setting this whole area to Thinking but since Shindou is actually speaking here, decided not to.

Ending credits: R-F had "Kanako" for Yukiji VA but it should be Kaneko. Fixed.

Episode 64

I want to explain about R-F changes for this episode and future episodes. It's the only episode besides 58, 74 and 75 to go back to the older border and shadow values for dialogue.

The Fantasy karaoke has also changed border and shadow thickness (again same for 74 and 75). The Real Fansubbers presents and episode title cards also changed border and shadow thickness.

64, 74 and 75 also have increased border for the staff intro and ending credits.

This is the start of the "Music is my Thing" karaoke which is a 2 outline for 64 but 65 onwards till 73 is likely 1.25 (asked llbx who agreed it's probably 1.25). 74 goes back to a 2 outline. One thing that surprised me is I expected "Ring My Bell" and similar to be bolded in 74 but every instance seems to not be bolded. This ending has also been completely retimed to fit Blu-Ray (thanks to llbx). 64 and 65 share the same timing but 66 to 74 has been put back 1 frame. I have left in an old commented version with R-F timing that llbx did at the very start of the project if anybody wants it.

20:44: R-F has the credits as Bousei Namakura for the character's name but this should be Shigezou Nakamura. This meant I had to slightly change the position of the text. I have commented out the original line if anybody wants it.

Episode 65

This was a strange episode to match with subtitle timing to R-F. Normally when I do visual frame matching for subtitles, it's within a frame of the dialogue but here it's sometimes 2 or even 3 frames too late. Not only that, some lines are ridiculously short (around 27 characters per second). I retimed every single line in this episode and extended when needed. I'm really happy with this.

5:22: I thought to set "Waya!" to Default instead of Background. It sort of makes sense why they did this since Shindou's back is turned so kept it as Background.

6:16: Set to Background.

8:12: R-F timed from Isumi's "Ahh" but should probably be done much later. (frame 11809 vs 11791).

9:21: Both lines set to Default. The guy is now on screen talking so no longer has to be set to Background.

9:29: Set to Background.

14:11: Set to Background.

19:19: Pretty sure this should be "some time" and not "sometime" so changed.

20:44: In this episode (and 67), R-F has Isumi's name wrong. It should be Shinichiro but they had Shinichiori. Fixed. I left the original line commented.

Ending karaoke: As briefly mentioned in 61/64, this karaoke and others have the kanji and romaji at bord1.25.

Episode 66

5:06: Set to Background.

14:04: Set to Background.

18:40: Set to Background.

Ending credits: R-F had “Susume Chiba” for Sai’s VA when it should be “Susumu Chiba”. R-F also had “Sanae Koboyashi” for Akira Touya’s VA but it should be “Sanae Kobayashi”. Company president had “Yoshiyuk Kaneko” but it should be “Yoshiyuki Kaneko”. All fixed.

Episode 67

Similar to 65 but this time visual matching subtitle timing to R-F means really early timing (sometimes by 4-5 frames). Some scenes are much shorter so I had to individually retime every line.

8:16: Set to Background.

9:05: Set to Background. Also changed from “Nevermind” to “Never mind”.

9:50: Set to Background.

11:58: R-F definitely didn’t give enough time to read this line. I extended it enough without being totally ridiculous. R-F had 32 frames and even at the 47 frames I’ve set, it’s still 24 CPS.

12:09: Typo by R-F. “aggresion” but should be “aggression”. Fixed.

12:26. R-F had “This a skill” but changed to “This is a skill”.

14:08: R-F had this line as Background but Isumi is on screen. Likely an error since the last line was Background. Have set this to Default.

15:48: R-F had “Yang Hai Xian Sheng?” but Zhao just says “Yang Hai-san?” so decided to do that.

20:44: Just like 65, R-F has Isumi’s name wrong. It should be Shinichiro but this time they had Shinchiro. Fixed. I left the original line commented. R-F does have the correct spelling in 69, 70 and 71.

Episode 68

Since the text doesn’t show up on Blu-Ray, I never did any of the “When watching anime” signs besides the funny E-F one in episode 4. This was another example I had to include. “When you watch anime, strap one TV to each eye and make sure your life insurance is paid up.” Font of 23.8 here.

4:57: I know this line is super fast but it’s even faster on R-F so I changed the timing slightly.

5:37: gabest11 subs had “Akari, stay after school and study with me.” which fits better than “Akari, stay after school with me and teach me.” I changed

to that since the previous line Hikaru also talks about studying for high school entrance exams.

9:40: R-F was slightly off on the frz tag for this (345 vs 346) so adjusted it slightly. Looks better now.

Ending credits: Like 63, R-F had “Kanako” for the Yukiji credit but it should be “Kaneko”. Fixed. They do actually have “Kaneko” in episode 71.

Episode 69

8:15: Capitalization for “institute”. Each time E-F/R-F have typed this it’s always been capitalized.

11:48: Added a comma after “Oh”. R-F usually does this and since Isumi has a comma next sentence for his “Oh,” it gives some consistency.

14:33: This line is pretty quick to read but it’s exactly the same frames as R-F. Could look into extending it maybe.

15:02: Set to Background.

16:51: Set to Background.

Episode 72

6:52: While doing this sign I noticed there is a faint vertical red line near the right hand side of the board. It does also seem to exist on the TV broadcast (especially near the bottom) just much harder to see.

Episode 74

As stated in episode 64, different outline and shadow values for this episode (and 75). R-F seems to have bolded the English lyrics and op61_special texts such as “Woo Wooo” and “Baby for you…”

I don’t think the romaji or kanji have been bolded. The bold change is also in 75.

In the Fantasy intro and Music is my Thing ending, R-F have a different font for the kanji. They went from MS Gothic and MS PGothic respectively to what I’m pretty sure is Arial Unicode MS. This makes sense since the ending 75 karaoke is also Arial Unicode MS. They do not seem to have changed the font size at all because if you do just change to Arial Unicode MS, it’s basically a pixel perfect match.

3:18: Small title fix. R-F forgot to capitalize the m in Match. Every other title has this so changed it.

There is a difference between the TV broadcast and Blu-Ray in this episode. At about 4:32, Shindou talks about doing a Suberi and "If I want to win.". Those lines are not in the TV broadcast at all and that line of Suberi actually plays as he puts the stone down on R-F about 8 seconds later. It makes more sense for that to be "There you go!". The default subs had this so I kept it. If that's wrong then someone can let me know and can get it fixed.

Igo intro: Just like 58, set to Bold and shadow size increased to 1.5 for small text and 3 for Igo as it seemed close. Episode 64 is another change episode for outlines but the intro doesn’t exist on that episode and since 75 doesn’t have the igo intro, only 58 and 74 need to be changed.

22:50: Igo sign. Pretty sure R-F did a box style reveal with trailing fade but I opted to do per character fade instead. It’s not an exact match of when the characters appear because of that but I think it looks better this way. They also did a box to hide the text but I think doing per frame character hiding

with help from an4 gives you much more control and looks much better. Got some help with fade timing from llbx.

Episode 75

As stated in episode 64, different outline and shadow values.

Additional info about this in 74 but the kanji for the opening has also changed to Arial Unicode MS. They probably did this to match the ending karaoke. This is a welcome change because if you do include MS Gothic for the intro and Arial Unicode MS for the ending, the fonts collector in Aegisub says there could be a problem with the font size attachments being over 32MB. Update: In order to save approx 40MB in overall file size for 74 and 75, llbx has subset Arial Unicode MS in 74 and 75 to just include the kanji glyphs.

2:30: Like the episode 74 title, R-F forgot to capitalize the m in Match. Fixed.

3:26: “nevermind” to “never mind”.

12:32: I changed which line had Background applied. R-F did “It’s about to start.” as Background but that’s when the guy is on screen. It makes more sense for “It’s not looking good.” to be Background.

17:35: R-F had “Tomoko Kawamichi” for Shindou’s VA credit but this should be “Tomoko Kawakami”. Fixed.

19:07: R-F did a box style reveal for the “Waya-kun congratulations” text which I tried to match as best I could frame by frame. In the commented lines I included a pure fade version with slightly different positioning. The current positioning is very similar to the credits which has x moved 3 pixels to the right and y up by 3 pixels.

The Road to the Hokuto Cup

Memory style: Unlike the main anime by E-F/R-F, I couldn't tell if the shadow was just black or if they had assigned the outline colour like E-F/R-F. I decided not to do it so maybe if a v2 of this script ever happens, consider changing shadow colour to &H8027081C

Since the special got released in January 2026, I made some really small changes to the script. I standardised the fade timings for all notes to match better.

Intro karaoke: For the "Nakama to tawamure sore nani de itemo" line, the nani should be nari (pointed out by llbx, thanks). Fixed.

At 17:18, AonE had a double space between "Huh? Wait a sec…" so this was changed to a single space.

25:03: Double space between Huh? and Is. Fixed.

34:25: Maybe "Go ahead, nigiri." should be set to Background but kept as Default for now.

44:44, AonE also had an extra space between "Already. What's". Fixed. There is probably more like that, just ones I happened to notice when doing alignment checks.

Around 45:04: Changed the styling of Akari! From Default to Background as it should be.

47:29: I set "Well then, let's go over the rules." to an8 since it obscured the "Team Selection Match" and "First Round" signs.

52:11: Same as 47:29. Set “Well then, please be seated.” to an8 for the “Team Selection Match” and “Second Round” signs.

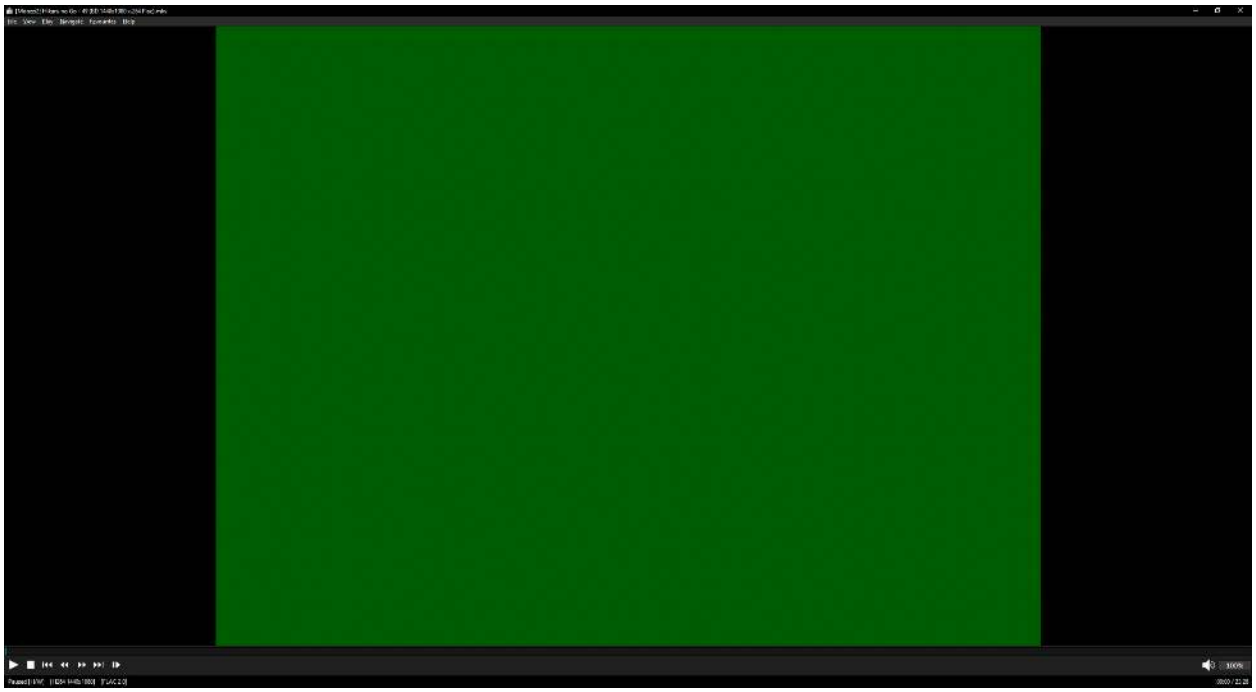

The only time I made a major change because I’m pretty sure it was an error. At 57:50 there is a line “He’s starting to cut in!” but it’s only on for 11 frames. More than likely they meant to time it from the gasp which is what I did. Now the timing is 33 frames.

1:00:16: Initially set to default then background styling after scene change. The guy is clearly talking on screen and it really sounds like they got Kuwabara to voice him.

1:12:00: “Then the god of go must be quite lonely.” started off as Background since Hikaru is off screen and changed to default after being on screen. AonE does this a lot in this sub, so it made sense to do it here.

Video fixes for episodes 49 and 55

The source video from Moozzi2 has 2 small “glitches” in the intro for episode 49 and 55 (very first second). It’s 3 green frames. The first is on for 2 frames, then one normal frame followed by another single green frame.

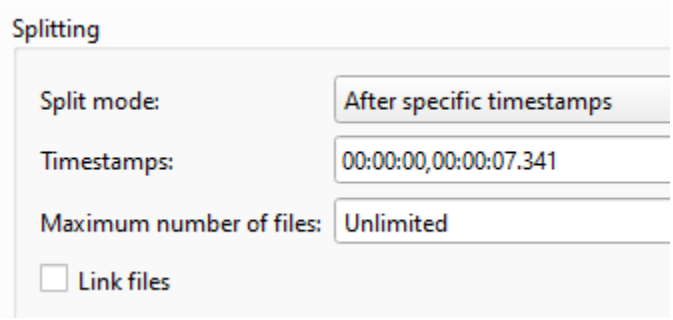

Every other intro seems fine so I decided to try and fix them and make a proper version for the release.

I was having some trouble with audio sync doing a combination of avidemux/mkvtoolnix so I tried to do all of it in mkvtoolnix. Below was the steps I took:

Take a non glitched intro like episode 31 and put it into mkvtoolnix gui.

Go to the output Tab and splitting. I know with avidemux that the first keyframe for all files is at 7.341 seconds and since mkvtoolnix only works with keyframes (well from what I read anyway) we’ll do that.

For split mode, set it to “After specific timestamps” and put in “00:00:00,00:00:07.341”

If you multiplex like this it will fail stating “Splitting tracks of this type is not supported.”. It’s some problem with FLAC so click additional options and add “--engage append_and_split_flac”

Now after multiplexing, there should be two files:

001 is the 7.341 seconds file we need and the other is the rest of episode 31 which we don’t need. The 001 file has been renamed to “for mkvtoolnix”.

Let’s now do the exact same steps as above for episode 49 but this time the 002 we need since it’s the actual episode:

I renamed it to “49 for mkvtoolnix”

Then drag in “for mkvtoolnix” and “49 for mkvtoolnix”. When you drag in the second mkv, select “Append to an existing source file”.

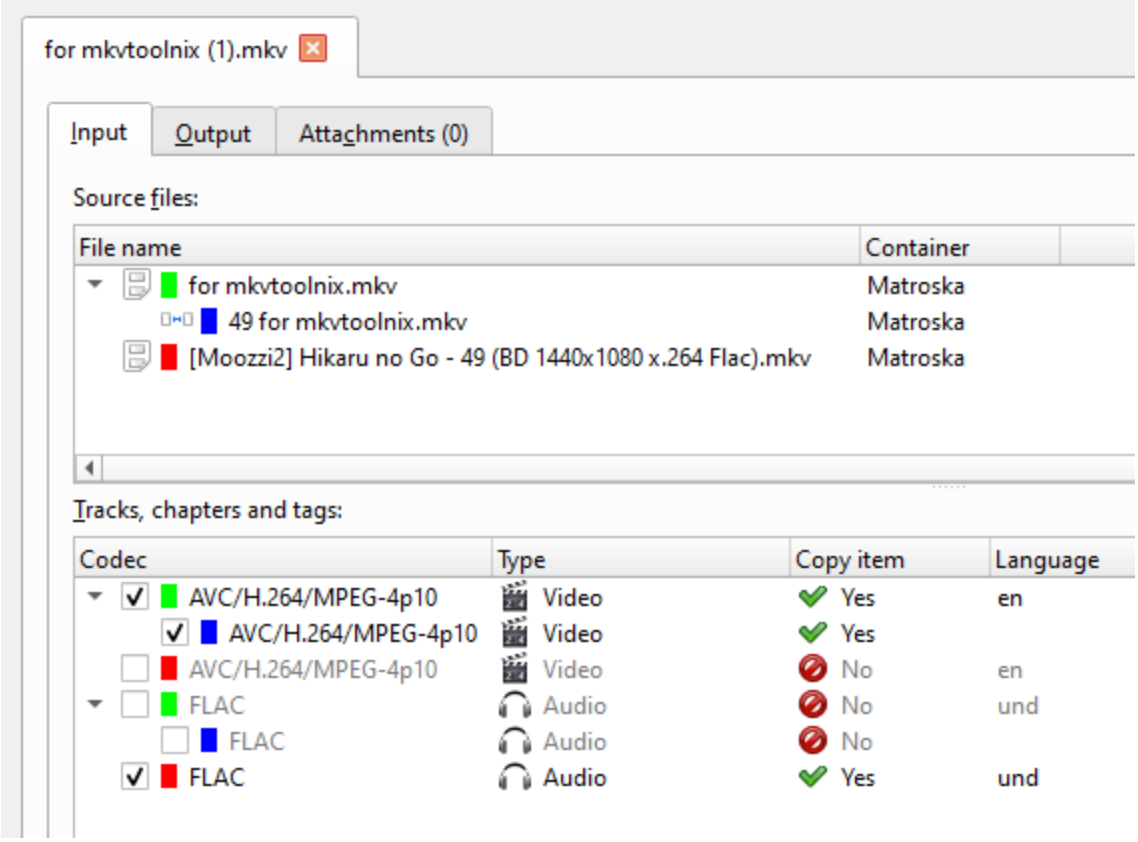

Now drag in the original Moozzi2 49 video. This time select the top option when dragging in:

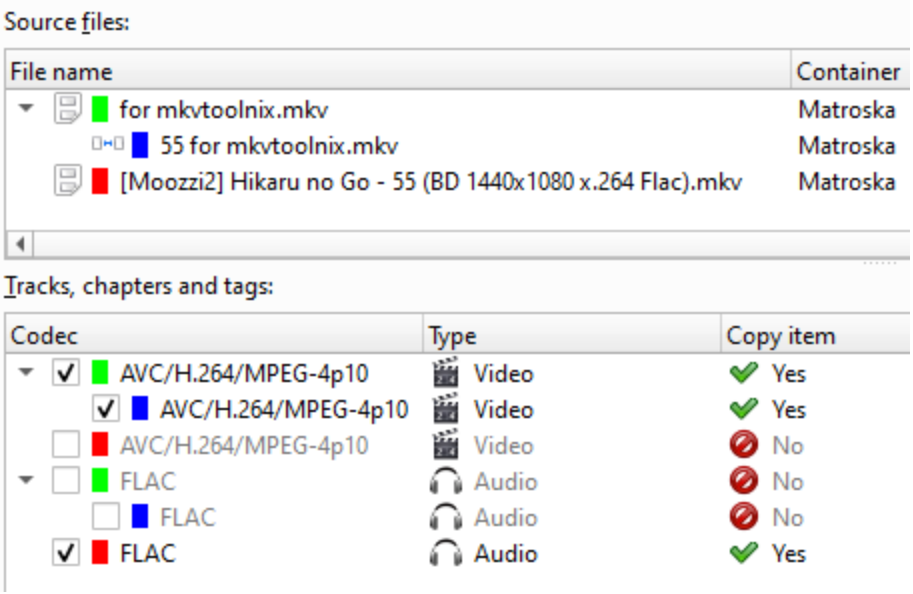

Please note: If you don’t do this specific order then in Aegisub, the video will be out of sync for some reason. E.g. if you mux together and then do a separate mkvtoolnix instance for putting in the raw audio.

Now configure like so only taking the video from our split files and audio from 49.

We do not need the additional options so just mux the file. Renamed to “[Moozzi2] Hikaru no Go - 49 (BD 1440x1080 x.264 Flac) v2”

Repeat all above steps for 55:

That way should keep video and audio sync all done inside mkvtoolnix.

FFmpeg alternate fix

If you want to do this with Avidemux and FFmpeg. Maybe this version would be better as I never had problems with sync.

Put 31 into avidemux, up on keyboard (go to next keyframe shortcut). It should be on 7.341 seconds. Click the A (start marker) then delete on kb to be left with just that 7.341. Click and drag in 55. Go to 7.341 (should be an i frame else avidemux complains it will be corrupt), click A, right on keyboard till 14.682 (the same i frame), then set end marker and delete. Now the 31 intro (well first 7.341 seconds) should be perfectly spliced into 55. Make sure video and audio are copy and output format is mkv then click Save Video.

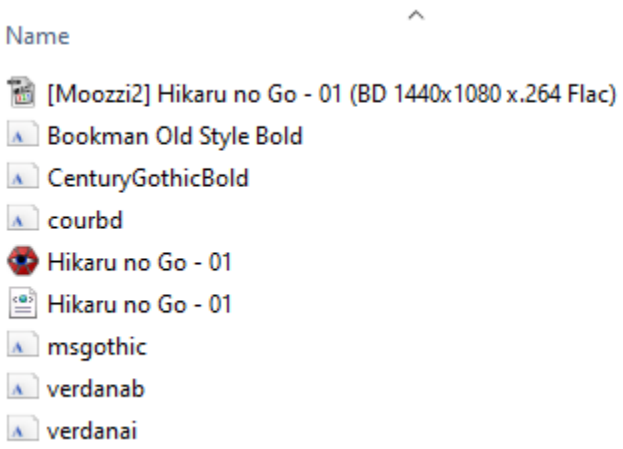

Run this ffmpeg command (55ffmpeg being the avidemux file and 55raw being Moozzi2). 55muxed is the final muxed filename.

ffmpeg -i 55ffmpeg.mkv -i 55raw.mkv -acodec copy -vcodec copy -map 0:v:0 -map 1:a:0 55muxed.mkv

mkvtoolnix batch script

Individually muxing 75 episodes has room for error. This is perfect for a batch script. I know nobody will actually need this but keeping for myself as a backup. I'll quickly explain what this does.

Folder on Desktop called Release. Inside that is 75 folders named from 01 to 75. In each folder is the corresponding mkv, subtitle file, chapter file and fonts. Example for episode 1:

Audio is set to Japanese and the subtitle track set to English with the name being either E-F Restoration or R-F Restoration depending on the episode number.

The script will also go through each folder and mux the files and output them into a folder called "Done" inside the Release folder. The script will also make sure episodes have the correct tag (E-F for 01-39 and R-F for 40-75).

The command line is what you would get if muxing via the gui.

The script starts on the next page.

```
@echo off

Fixes after June 2026 release for October 2026

This is a list of small fixes applied to scripts since the June 2026 release. These are currently on the github for download.

Update in August 2026: Still unclear if there will be another release. The nyaa downloads are over 220 right now and nobody has said anything about any errors. Don't think what is below warrants another release as it's really small stuff.

Green: Done

Yellow: Need to fix nearer release time/look at again.

In general: In ending 2 the "manzokushiteru" line has a space in the kanji. Remove this?

Episode 2: Line 141. "Oh, that's fine with me.." E-F did actually have 2 .. here but likely it should just be one. There are also some other lines I matched to E-F like line 134 "Y..yeah." that should maybe be changed. Not a fix as sort, just noted down.

Episode 3: Line 19. Put back 1 frame and extend by 1 more frame. Original line commented out.

Episode 6: Slightly adjusted the timing of lines 4, 5, 8, 9 and 10. They weren't on for long enough or started ~1 frame too late.

Episode 7: Line 132. Put back 2 frames. Line 33 also put back 2 frames. I commented out both original lines.

Episode 8: Line 11/12: With an2 applied for the note it makes "Oh there it is. Is this it?" have a really strange placement. Originally had the book titles extend all the way to the end but changed it to be more like E-F since that gets rid of any problems with alignment. I also included a version similar to E-F (fs13 and double \N) commented but I think what is there is much easier to read. Line 130: Put this back maybe 2 frames? Update: Fully retimed this section to match E-F exactly.

Episode 12: Line 6: Put back 1 frame. The note at line 120 was half done by gabest11 before I changed it. For some reason I didn't notice I kept in "Year" next to Shindou's name. Took this out to be closer to E-F. To be honest this could be worked on even more to better match E-F as the line spacing isn't exactly the same. Line 121: Put back 1 frame.

Episode 14: Line 24. "I'm white, Shindou-kun's black." Put this back 2 frames. Current is now 64 frames but E-F is 68. 64 seems fine.

Episode 15: Line 193. Extend the sign to the ending frame? Current is E-F timing. Update: Have extended to the end but left in E-F timing commented if anybody wants it. Line 255. Put back 1 frame. Line 257. A leftover timing line from gabest11. The "Yeah" didn't start in time like E-F. Retimed. Old commented values have been left in. Line 259: Maybe put this line back back. E-F starts during the "Mmmmm". Line 294: Put back 1 frame and an extra . removed (left over from gabest11 script I missed). Line 334: Set to Sai. Sometimes E-F didn't actually style lines like this as Sai but I think every line should be set to Sai if appropriate. Line 337: Put back 1 frame. There are more lines that could do with putting back a frame or so that are left over from the gabest11 subs but will leave for now.

Episode 17: Line 296. “One of these formations” to “Out of these formations” as E-F have. Just misread this line (probably because it ends with “one”).

Episode 18: Error from the gabest11 subs I didn’t notice. Line 13. “It doesn't matter If he loses the first match.” but should not have capitalisation for If so should be “It doesn't matter if he loses the first match.” like E-F. Line 57: Put back 1 frame. Line 136. Thanks to wloff again from reddit for pointing this one out

Episode 21: Thanks to wloff again from reddit for pointing this one out. Line 57. Missed out an e in “the”. I also put it back 1 frame. This happened because I wasn’t sure what margins E-F/R-F had so I would just brute force multiple lines to be the same as them with \N. It’s why the styles have 0 for left and right margins.

Episode 22: Line 40: Took out an extra . for “I can't hang on…”. Line 41: Put back 1 frame. Line 42: Added a ! for “as well!?” and put back 1 frame. Line 43: The “Oh” starts much earlier now like E-F and doesn’t bleed into the next scene. Line 44 was put back 1 frame. Line 49: Put back 1 frame 2 frames off the end. Line 50: Put back 1 frame. Old lines left commented.

Episode 23: Line 22: Took out “a” in “a second class” since E-F didn’t have this. I also took frames off the end to not bleed into the next scene like E-F. Left in the old commented line. Line 39: Put back 1 frame. Line 42: “And still lost to Touya twice.” but it should be “And you still lost to Touya twice.” Also took a frame off the end so it didn’t bleed into the next scene. Thanks to wloff from reddit for pointing this one out. Line 313: “load” to “loud”. A typo left over from the gabest11 subs.

Episode 24: Line 31: Back 1 frame. E-F actually starts this even earlier but current timing now is fine I think. Line 45: Back 1 frame (not commented out the old version). Line 51: Put this back 1 frame and took out “the” to match E-F, an error left over from the gabest11 subs. To be honest this should probably be “with black”. Line 52: gabest11 subs missed out “Yes!”.

Added it in. Line 190: Put back 1 frame. E-F actually didn't time this line to include the "Yes" but it should be.

Episode 26: Title: Since E-F joined episodes 25 and 26 together they never translated the 26 title. At first I took the official translation of "A-League" but since that is the English localization (second class is also referred to as B-League on Apple TV) it probably makes more sense to have the episode title as "Welcome to the First Class". Maybe "Welcome to First Class"? Start of episode: "look!" to "Look!" to match E-F?

Episode 27: Line 23: Technically not an error since it's the same as E-F but the line: "You're right, we need to let lose sometimes." This should be "loose".

Episode 28: Line 24: Put back 1 frame. Line 32: Put back 1 frame. Line 33: Put back 1 frame and took one from off the end, Also took out an extra space between … and Nozaki. Line 34. Put back 1 frame.

Episode 32: Line 81: "I'll make him turn those eyes to me!" Put back 1 frame. Thanks to wloff from reddit for pointing this one out. Line 199. The E-F subs have "Matsui-kun" but it should be "Matsuura-kun": https://www.behindthevoiceactors.com/tv-shows/Hikaru-no-Go/Matsuura/ I also put this back 1 frame.

Episode 34: This is actually something not done by E-F but looking now it probably would have been if the TV broadcast was the same as Blu-Ray.

The sign is off screen on TV broadcast but isn't in episode 33. I have taken the E-F Heart of Stone sign from episode 33 and put it into 34.

Line 321: Must have been really tired when I did this Igo sub. Had "0 Meien Honinbou". Should be O, not 0. Fixed.

Episode 36: Line 129: Set to Background and put back 1 frame. Line 126: Changed the ending time to not bleed over. I also put lines 127 and 128 back 1 frame.

Episode 40: Line 71: "yesterday" to "yesterday's".

Episode 44: Lines 78 and 79 put back 1 frame.

Episode 46: Line 195. Back 1 frame.

Episode 47: Line 375: The timing of "Oh yeah, Mom's out shopping." isn't like R-F so changed that. It starts much earlier now. Commented out the old line.

Episode 51: FREE PLAY AREA sign. I tried to match this like R-F but I think the blur is too much. Maybe set blur1?

Episode 53: Not really an error but thinking now it should be included. R-F only did “The 9th Annual Wakajishisen” sign in episode 56 but the same scene is in this episode. Since it’s the exact same frame amount, it was an easy inclusion. This now starts line 336 (the fades from llbx also included). Also tidied up some timings on some lines near this. Commented out original line timings. Line 261 “But…” should maybe be retimed.

Episode 55: Some small errors from the gabest11 subs I missed compared to R-F. Line 185. “What” to “Why” and Line 190 “but you had turned it off.” to “but you had it turned off.” Line 305: Took out an extra .

Episode 56: Episode titles go on for 10 extra frames. No idea how I missed that. My best guess is since the ending frame should be 4124, I mistakenly misread and put in 4134 for both. This is now fixed.

Episode 57: Line 443: Left over error from the gabest11 subs I missed. “shinning” when it should be “shining”, now fixed. I spell checked the scripts twice before release but since shinning is an actual word it never showed up.

Episode 59: Line 344. “Why is he in such a bad mood?”. Set to Thinking.

Episode 60: Sometimes hard to know when picking blur values from the standard 0.8 but line 60 to 63 could maybe do with blur0.9 or blur1 to blend in slightly better. See 62 but the Grave of Shuusaku sign isn’t done in the next episode preview for this episode. R-F didn’t do it either but that might be because of all the overlay text.

Episode 62: Grave of Shuusaku sign isn’t done in the recap. This was the first episode I did and was more focused on getting the dialogue done so that's probably why I missed it. Put this in from episode 61 but likely needs the move redone since it’s much shorter. Frame 2604 to 2639. Something like this but fix the first frame:

{\fs21\blur1\1c&H403E43&\4c&HFFFFFF&\fscx100\fscy101\bord0\shad1.5\frz356.5\move(403,79,403,17)}G\N{\fscy100)}R\N{\fscy99)}A\N{\fscy98)}V\N{\fscy97)}E\N\N\N{\fscy90)}O\N{\fscy90)}F\N\N\N{\fscy84)}S\N{\fscy81)}H\N{\fscy81)}U\N{\fscy81)}U\N{\fscy77)}S\N{\fscy77)}A\N{\fscy75)}K\N{\fscy74)}U

Every line in 62 was frame matched to R-F. The problem with that is sometimes it doesn't sync doing that (episode 65 taught me that much later in the process of doing this) so some lines are mistimed. Lines 196 and 198 got put back some frames, left in old commented lines. Line 216. "You've got to go to the Go Institute for Go stuff." Probably put this back at least 1 frame. R-F is 113 frames. Could do with being 114 or more. 24408 start or maybe even 24407. THINK ABOUT 24407.

Episode 63: Forgot to do the third lot of VA credits in the ending (starting Asumi Nase). This is now included. The Junichi Endou credit also makes it clear that R-F had the lyrics on the top layer so I matched for episodes 61 to 63 by setting layer 1.

Episode 64. Ending Igo. R-F didn't have this line but taken from official subs. "Please continue to watch\N us this year, as well!".

Also slightly retimed some lines in this Igo.

Episode 69: Line 259 and 260 sign. Looked ok on Aegisub but playback colour seemed weird on MPC-HC but think it's an internal subtitle renderer problem as seems fine on mpv. Think about extending this upwards all the way? Also slightly extend down. Update: Have just extended this down to 481 to totally cover the bottom. This was one of the first boxes I did.

Episode 71: Line 13. “I'm going now.”. Put this back 1 frame and extended by 2 frames to match R-F. Still doesn't extend 9 frames to next scene like R-F but seems fine. Starting before Shindou speaks is probably better.

Something I only noticed due to episode 71. The english lyrics for “Music is my thing” should probably all have layer 1 applied. The Tsujioka 2-dan credit as an example if you don’t do this.

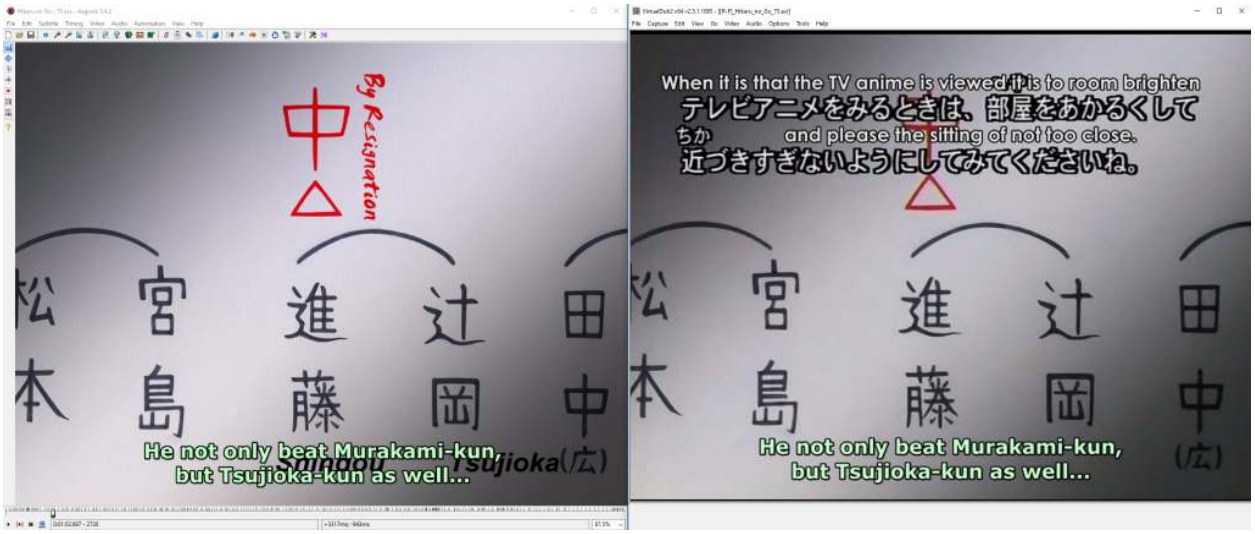

64 to 74 have all been set to layer 1.

Episode 72: Not really a fix as such. Not sure if “Congratulations Loae!!” “This is sensei's 150th translation!!” should be included. If it does, probably need to add the kanji. Commented out for now.

Episode 72: Line 11. “I just need to wait..” Took out extra . and start on frame 3900 to be 27 frames like R-F. Line 17. “Murakami-san thought he was\Nfoiling Shindou-kun's advance,” start on frame 5508. Line 109: Kun to kun.

Episode 73: You can’t really call this an error but added it in since it made sense. In the recap for this episode, R-F didn’t show the signs that appear in episode 72 because of how much overlay text is on screen from the TV broadcast. Since Blu-Ray doesn’t have this, it should probably be added. Set Dialogue to layer 1. I just copy/pasted the signs from episode 72. I also added in “-kun” to Tsujioka to match R-F. Have commented out that line.

Episode 74: Line 10. “I haven't played you since the third\Nboard match in the Go club.” Put this back 1 frame but keep the 89 frames.

Episode 74: Line 47. Forgot to add “-kun” for “Shindou-kun”.

Episode 74: Line 80. “Hong Su-Young, 14. Yet another\Nincredible new player for Korea.” Put back 2 frames.

Episode 74: Line 81. “The sixteen year old Ko Young Ha is setting the\Nrecord for the longest winning streak right now.” Put back 1 frame.

Episode 75: Line 18. “Only I knew of Sai until now…” Extended to 52 frames like R-F. Line 21 also put back a frame but kept the 93 frame total.

Episode 75: Line 119. “you've said' Oh! I see." to “you've said "Oh! I see."

Episode 76 (special). Line 233. Missed out one subtitle line “Let’s go”. Added in. I timed this exactly the same but starting on frame 23999 might be better.

How to apply the fixes before that time

I don't know how many fixes will be found to warrant a rerelease so I'll write this part for the small fixes above.

If you want a super easy fix, you can just take the subtitle files from the github and rename them the same as the video files. Your media player should automatically play them. For example: Hikaru no Go - 01.ass would become [E-F Restoration] Hikaru no Go 01.ass

If you want a proper fix, see below.

Step 1: Grab the latest script files from the github and put them in the same folder as the mkv files. Example:

The icon is the Aegisub icon. Yours will likely be Notepad or similar.

Step 2:

Below is a batch file to take out the subtitle files and mux in the fixed subtitle files from the github. This still keeps fonts and chapter files attached.

Please note: set your mkvmerge, base dir and out dir correctly. In this example, mkvmerge is on the Desktop. The mkv and subtitles files are held in a folder called Fixes and the resulting fixed video files will be stored inside another folder called Fixed (once finished you can then rename the Fixed folder back to [E-F & R-F Restoration] Hikaru no Go or whatever you want). Just made the folder names basic to limit any problems with the script.

Script starts below:

```
@echo off
setlocal enabledelayedexpansion

:: Define Base Paths
set "MKVMERGE=C:\Users\Name\Desktop\mkvtoolnix\mkvmerge.exe"
set "BASE_DIR=C:\Users\Name\Desktop\Fixes"
set "OUT_DIR=%BASE_DIR%\Fixed"

:: Create the "Fixed" folder if it doesn't already exist
if not exist "%OUT_DIR%" mkdir "%OUT_DIR%"

echo Starting MKVToolNix Batch Processing...
echo.

:: Loop from episode 1 to 75
for /L %%i in (1, 1, 75) do (

    :: Add a leading zero to numbers 1-9 (e.g., turns 1 into 01)
    set "EP=0%%i"
    set "EP=!EP:~-2!"

    :: Determine the Restoration Tag based on the episode number
    if %%i leq 39 (
        set "TAG=E-F Restoration"
    ) else (
```

```
        set "TAG=R-F Restoration"
    )

    :: Construct the full file paths based on the current episode
    set "VIDEO_FILE=%BASE_DIR%\[!TAG!] Hikaru no Go !EP!.mkv"
    set "SUB_FILE=%BASE_DIR%\Hikaru no Go - !EP!.ass"
    set "OUT_FILE=%OUT_DIR%\[!TAG!] Hikaru no Go !EP!.mkv"

    :: Verify both the video and subtitle files exist before attempting to mux
    if exist "!VIDEO_FILE!" (
        if exist "!SUB_FILE!" (
            echo Muxing Episode !EP!...
            "!MKVMERGE!" --ui-language en --priority lower --output
"!OUT_FILE!" --no-subtitles --language 0:en --display-dimensions
0:1440x1080 --language 1:ja "(" "!VIDEO_FILE!" ")" --language 0:en
--track-name "0:!TAG!" "(" "!SUB_FILE!" ")" --track-order 0:0,0:1,1:0
        ) else (
            echo [ERROR] Subtitle missing: Hikaru no Go - !EP!.ass
        )
    ) else (
        echo [ERROR] Video missing: [!TAG!] Hikaru no Go !EP!.mkv
    )
)

echo.
echo All episodes processed!
pause
```

Step 3: Copy/paste the script into Notepad and Save As with a .bat extension and set to all files. You can save the file anywhere.

Step 4: Run the script then wait till finished. Enjoy your updated and fixed subtitle files!
